To Amalgamate Municipalities Into Forty Districts

Premier Brownlee Announces Proposed New Plan of Amalgamation

Abolition of the present system of small municipal districts in the province, and the creation in its place of a system of "enlarged municipal areas," under which 166 municipal districts now in operation together with some 143 improvement districts now administered by the provincial government, would be amalgamated into some 40 "enlarged" areas thereby eliminating a large part of the cost of government, both provincial and municipal, while increasing efficiency of administration, is proposed in a plan announced this week by Premier J. E. Brownlee. A saving in municipal administrative costs alone of one-quarter of million dollars or three quarters of a million on the total rural assessment in the province is estimated, while the saving in provincial administrative costs and in the costs of all public services will run into very large figures.

The proposal, which has already been before the provincial cabinet, and is now presented to the public by the Premier, is the result of two years of rather exhaustive study and survey of the province conducted by an official of the Department of Municipal Affairs. The plan is entirely different from any scheme of large municipal organizations in existence in Canada or the United States, and is simply the application of the principles of our present small municipal unit to the larger area and continues the existing idea of only one authority for municipal administrative and taxing purposes.

The plan so far developed will, in accordance with a resolution of the last convention of the municipal districts association, be discussed further with the executive of that organization who have already been in consultation with the departmental officials in its preparation. It will then be submitted to the next convention of that association after which it is hoped that it will be ready for submission to the next session of the provincial legislature. As a matter for discussion only, a map has been prepared setting out a plan of consolidation which appears reasonable and equitable to the departmental officials; but this map will, of course, be subject to adjustment, both as to the number of large units and their boundaries. The new districts would be set up in accordance with certain fundamental principles, more or less as follows:

Grouping of localities having a common interest, and being of the same general agricultural and geographical classification as far as possible.

Maintenance of the municipal boundaries along township and range lines save where natural boundaries such as rivers might more advantageously be used.

Existence of sufficient population and assessable property so that each unit could function economically.

Consideration of the accessibility of the administrative centre. Government of the units would be much the same as the government of the present municipal districts.

There would be a council of six or eight elected from six or eight wards or electoral divisions established in the enlarged municipal area with the possible chance of having the reeve or chairman of council elected at large, rather than by appointment from the membership of the council as at present.

Premier Brownlee, in discussing the new plan, points out that the development is a logical one, in view not only of the urgent necessity for reducing the general cost of government wherever justified, but also in view of the fact that with the vastly improved facilities of transportation and communication of the present day enlarged areas are in reality more easily administered than were the smaller units under the conditions which existed when the present system was created.

One of the great benefits of the large economy in the cost of administration, both provincial and municipal, already referred to.

Other advantages of the plan would be:

—A greater equalization of the tax burden.

—A more uniform and more equitable assessment of the lands in the area, since the judgment of the assessor would be applied over a much larger area.

—More uniform school levies and a saving in the administrative cost of education.

—A more co-ordinated system of road building, the enlargement of the municipal areas making it possible to bring the roads into alignment with those of other districts and with the general provincial highway plan.

The plan, if adopted, would present also the opportunity for a review of the whole field of taxation as between the municipalities and the government. The possibility is suggested that the provincial government would abandon the field of real property taxation, leaving that to the jurisdiction of municipal councils, urban as well as rural.

—From the office of the Publicity Commissioner, government buildings, Edmonton.

Heathdale

Miss Dorothy Neff is visiting with her sister, Miss A. Neff for a few days.

The U.F.A. Sunday, June 19, held at Faulkner's Grove, was well attended. An afternoon service was led by the Nazarene minister, Mr. Falk. A few of the Mennonite boys contributed with a number of musical selections. Later a picnic lunch was enjoyed by all.

Mrs. W. Anderson and Evelyn, and the Misses Audrey and Dorothy Neff visited Tuesday afternoon with Mrs. Harrington.

Mr. Mumford was a recent caller in the district.

An obstinate man does not hold opinions. They hold him.

Heathdale Old Timers' Rally

It has been decided to hold an old-timers' rally at Faulkner's Grove on the 3rd of August. Full particulars will be announced later.

A lot of men carry over a hundred pounds of condensed pressure in their boiler without a spoonful of sand in their box.

Hail Damages Excel Crops

Excel, June 17 — A severe hail storm fell in Farming Valley district, northwest of Excel, Tuesday afternoon. The stones were not so large as in the storm ten days ago but more damage was done. Hail fell for 15 minutes to a depth of three inches, accompanied by high winds and rain.

Wheat in the hail area was almost totally broken down. The farmers who suffered the severest damage were A. Wilcock, Joe Vanstone, B. Morris, Thomas Steen and C. Bishop. The storm came from the southwest, traveling in a northeasterly direction.

The millennium will have arrived when politicians can be sued for breach of campaign promises.

North America.

The Imperial Economic Conference

The Imperial Economic Conference, shortly to be convened at Ottawa, is unquestionably one of the most important gatherings ever called in the history of the British Empire. In fact it may easily prove to be one of the most important in the economic history of the whole world, because, whatever decisions it may reach will affect not only the British Commonwealth of Nations, but all nations.

There will be assembled together all the leading governing statesmen of the Empire, supported by the strongest possible groups of financial, economic, commercial and other experts that the Old Country and each of the Dominions can gather together. For months past these statesmen and experts, assisted by small armies of lesser experts and advisers, have been compiling and studying trade and monetary statistics, weighing the effect of this and that, probing as never before into the productive capacities, primary and industrial, of their countries, the natural resources, the state of employment, the requirements of their respective populations, the probable and possible trend of future developments and the extent thereof, and the effect of existing policies and possible future policies upon all these matters which enter into national and Empire growth, prosperity and strength.

And the object of it all is to evolve, if possible, new policies acceptable to all parts of the Empire, and which will prove of mutual advantage to all and having as their objective the encouragement and development of a larger volume of inter-Empire trade. This means that the possibilities and the requirements of each part of the Empire must be ascertained, must be appreciated by all the other parts, and the whole dovetailed together to the advantage not only of each component part, but of the whole.

It becomes at once self-evident, therefore, that one of the major tasks confronting the Conference will be to find ways and means of removing existing barriers to the free exchange of commodities between one part of the Empire and other parts, to the mutual advantage of both, and without, in the process, working injury to any part. While the Old Country representatives, and the representatives of each of the Dominions must, of necessity, give particular heed to the interests of their respective nations, it is an essential to the success of the Conference that this be done in no narrow, selfish spirit, but in such a way that while benefitting their own country they likewise confer benefits on the sister nations.

This does not mean that the spirit of approach to the intricate problems calling for solution must be one of making sacrifices; rather it should be in the direction of striving for mutual advantages. In fact the word "sacrifice" should be entirely absent from the Conference, while the term "mutual advantage" should be very much to the fore. In a word, the dominating ideal should not be that expressed in such slogans as "Britain First," "Canada First," "Australia First," but, on the contrary, it should be an adaptation of the motto of the Three Musketeers, "All for One, and One for All."

Along with the removal of existing barriers, and a mutual understanding or agreement that no new barriers will be erected, there must naturally develop policies designed to make ever easier the flow of trade into and out of all parts of the Empire to all other parts. This may involve the ultimate creation of a new system or method of monetary exchange, even an Empire currency. It would seem to be essential that some system be developed whereby the currency of any one part of the Empire should always be on a par with the currency of all other parts; in a word, that the same monetary standard should apply at all times throughout the Empire, and that, for example, at no time should the Canadian dollar be at a discount with the British pound, or vice versa. The guarantee of such a standard would undoubtedly be of tremendous assistance in establishing and maintaining inter-Empire trade at a maximum, removing, as it would, much of the uncertainty and loss which now prevails.

If the forthcoming Conference can achieve a measure of success along these and other lines having the same general object in view the beneficial effect upon all parts of the British Empire will be almost incalculable. Not only so, but no other trading nations could afford to ignore such a development. The breaking down of trade barriers within the Empire would quickly force the breaking down of trade barriers by all other nations. It would be the beginning of a reversal of the suicidal policy into which the world has drifted and which has resulted in an almost complete paralysis, or destruction, of international trade and commerce, ending in the present state of world depression, unemployment, suffering and hardship.

Canadians may well be proud if, from their national capital, there is evolved a new economic policy for their Empire and the world. That this should emerge from the Conference should be, and we believe is, the fervent desire and hope of the Canadian people irrespective of any minor political differences of adherence to special schools of economic or fiscal thought.

Only Three In Existence

Silk-Cotton Tree Attraction For Tourists At Nassau
Among the many attractions for American tourists at Nassau, in the Bahama Islands, is the famous silk-cotton tree, which rises seemingly like a pyramid, then, at the top, branches off in clumsy shoots. The trunk of the tree flares out curiously into ribbon-like formations. There are believed to be only three silk-cotton trees in existence.

There are two kinds of people: Those who aren't hateful by nature, and those who speed up when somebody looks to pass.

The man who says the right thing at the right time is rare. But not half so rare as the man who says nothing at the right time.

Pains In Stomach and Bowels So Bad Would Have To Sit Down

Mrs. C. Landry, Moncton, N.B., writes:—"I can certainly recommend Dr. Fowler's Extract of Wild Strawberry for cramps or pains in the stomach and bowels."

"Last Summer I had such awful pains in my stomach, and lower part of my bowels, at times, I would have to sit down. I took 'Dr. Fowler's' and was soon relieved."

"When my children were small I always kept a bottle in the house and it helped them wonderfully whenever any of them had bowel complaints."

Sell Seed On Certificate

Canadian Seed Growers Find Good Market In Great Britain

A statement just issued by Geo. H. Clark, Dominion Seed Commissioner, is of special interest because it shows that Canadian seed growers disposed of nearly 3,000,000 pounds of Red Clover and a similar amount of Alsike seed from the 1931 crop in the British market. He points out particularly that seed trade contracts in Canada are generally based on official grades while seed trade contracts with other countries are based mainly on actual samples. The advantage to the Canadian exporter is substantial when he can quote prices and receive offers by cablegram on the basis of seed certificate.

Air service between Cuba and the Isle of Pines is increasing.

Island Prison For Doukhobors

D'Arcy Island, Near Victoria, B.C. To Become Place Of Banishment
D'Arcy Island, about 20 miles from Victoria in Haro Strait, will become the home of some 300 Doukhobor men, sentenced to serve three years each for nudist parading.

Announcement of the creation of the island prison settlement was made by Oscar Bess, deputy attorney-general, on receipt of announcement from Ottawa of the decision. The Dominion government will almost immediately commence erection of such additional buildings and other accommodations as may be required.

The Doukhobors will be provided with agricultural implements so that they will be able to raise food-stuffs for their own maintenance.

D'Arcy Island was the site of a leper colony many years ago, but it has been closely inspected by medical officials, and has been given a clean bill of health.

It is understood that the Doukhobor women arrested, also numbering some 300, will be placed in a number of Dominion institutions in eastern Canada.

A total of 594 adults have been arrested. Three hundred and fifty-nine children will be cared for in various British Columbia institutions. Thus a total of 953 persons, men, women and children, are affected by the action of the Dominion and British Columbia governments in their efforts to establish peace in the portion of the interior of the province in which the Sons of Freedom sect of Doukhobors have lived. The countryside there has been in a state of unrest for years, with nude parades, burning and bombings and consequent menace to life and property.

Remarkable Success Of English Surgeons

Girl Walks After Spine Built Up By Foot Bone

As the result of a remarkable operation—the first of its kind in England—a girl, who for eight years was crippled, has returned home cured.

She is Miss Jessie Exton, 17-year-old daughter of Mr. and Mrs. William Exton of Duke Place, Worsnop, Up to the age of nine Miss Exton was a lively child, but her spine became affected by a tubercular disease, and for three years she was a patient at the Mansfield sanatorium.

She made progress, but a fall after she had returned home aggravated the disease, and she was again unable to walk.

The case was brought to the notice of the Duchess of Portland, and Miss Exton was removed to the Duchess' Orthopedic Hospital at Harlow Wood, Nottinghamshire, where the operation was performed by Mr. Malkin, the senior surgeon, who used a piece of bone from the left foot to build up the spine.

Miss Exton is now able to walk normally except for long distances. She has since visited Harlow Wood to show the success of the operation to 80 doctors from all parts of Europe.

Arctic Expedition

S.S. Ungava To Carry Mail To Mounted Police Posts

This year's expedition to the eastern Arctic, Baffin Island and Hudson Bay will be undertaken in the S.S. Ungava, which will sail from Montreal in July. The vessel will carry mail to Mounted Police posts and missionary stations, and will convey relief of personnel, stores, etc. All points in the eastern Arctic, as far north as Bache Peninsula, the most northerly police and customs post in the world, will be visited in the course of the Ungava's voyage.

Slightly Mixed

The president of a certain university was preaching on "Faith," and in declaratory theme, told his auditor, "You have blind faith in the physician. He gives you medicine and tells you to take it. 'Yours not to reason why; yours to do and die!'—Almost equal to this is the story of the minister who solemnly assured his congregation that "Many persons have one eye on heaven, while with the other they are listening to the gossip of the earth!"

Seasoned Alive

Dr. A. Gauducheau, of Paris, makes use of a principle of physiology and injects sauces and seasoning directly into the blood stream of chickens. He says this aids the flavoring in penetrating the meat and none is necessary on cooking the fowl.

A German scientist states that loss of 40 to 60 hours from the head in a day is the "normal" limit.

Automobiles are owned on 53 per cent of the farms in the United States.

Death Of Pioneer

Col. Herbert Swinford, Veteran Of Red River Rebellion, Dies In Winnipeg

Col. Herbert Swinford, veteran of the Red River Rebellion of 1870, and the North West Rebellion 15 years later, died recently in Winnipeg at the age of 83.

Born at London, England, he came to Canada with his parents as a boy, and jumped into uniform with the Wellington Rifles at Guelph, Ont., when Lord Wolseley was forming his expedition.

Following service, Col. Swinford operated steamboats on the Red and Assiniboine Rivers here. Later he was appointed general agent for the Northern Pacific Railway in Winnipeg. For several years he occupied the same position at Vancouver and returned to Winnipeg only six months ago.

Study Polar Phenomena

Saskatoon Professor To Be Member Of Party To Be Located At Chesterfield Inlet

In the special study of polar phenomena to be conducted in 1932 and 1933, in which over 100 meteorological stations will be taken, Saskatoon will have a special interest in the party of four to be located for a year at Chesterfield Inlet in the north-western corner of Hudson Bay.

Dr. Balfour Currie, professor of physics of the University of Saskatchewan, will be a member of the party, which is under the direction of Frank Davies, at one time an instructor in physics at the University at Saskatchewan. Mr. Davies was a member of the Byrd Antarctic Expedition and spent a year making weather observations there. He is well known in Saskatoon and was married here last summer.

No Fool-Proof Rule

Mushroom Hunter Must Depend On His Own Judgment

The public's desire for a fool-proof rule by which to distinguish an edible mushroom from a poisonous one is doomed to unfulfillment. Dr. Fred Seaver, curator of the New York Botanical Gardens, said in a lecture at New York.

"There is no such rule," he stated. "One must learn to know the mushrooms and to distinguish them as you would your friends from your enemies."

Dr. Seaver said that to the mycologist, or student of fungi, there was no significance in terms "toadstool" and "mushroom."

"A mushroom is an edible toadstool or a toadstool is a poisonous mushroom, whichever way one may wish to put it."

Waited Many Years

Woman Graduated Over Half Century Ago Just Received Diploma

An 88-year-old woman, who waited 65 years for her diploma, received it at Bates College commencement. The woman was Mrs. Sibyl Chase Ballard of Minneapolis, Minn., who completed her course at Bates in 1867, but failed to receive her degree because the college did not then confer them on women. Bates now is a co-educational institution.

Stop the Cough.—Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Dr. Thomas' Electric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

Bully Taken In

A man was persuaded by a dealer to give several guineas for a jar which, he was assured, was of great value.

The collector showed his prize to a connoisseur friend, who examined it thoughtfully.

"How much did he hook you for?"

"Seven guineas."

"Well, well! And he didn't throw in the marmalade!"

Teething

"Baby's Own Tablets take away that teething fever," writes Mrs. Alfred Bungay, North Sydney, N.S. Effective also in relieving colds, fever, colic, upset stomach, constipation. Children like them. Absolutely SAFE.

Earth Upheaval

Contour Of Island In Bering Sea Is Changed

An isolated Bering sea island, populated only by a herd of immense sealions and great flocks of birds, Bogoslov, has given Father Bernard R. Hubbard what he declares to be proof of how volcanic islands "grow."

A great steaming mound of lava, he said in a message sent to Sevard, has been pushed out of the earth and has changed the contour of one section of the island completely. The mass is apparently increasing in size.

The "growth" is taking place, the Santa Clara University professor messaged, at a place where formerly a sheltered harbor existed.

His observations were made on a voyage from Bristol Bay with his party on the motorship "Polar Bear." Despite storms and high seas, a successful landing was made.

40th Anniversary Of Sa'ada Tea Company

Forty years ago this month in an unpretentious little building on Front Street in Toronto, the Sa'ada Tea Company packed its first pound of tea. Founded in 1892 by the late Honourable Peter Sa'ad, the business progressed very rapidly and by 1895 a branch had been opened in Montreal. Two years later the United States market was invaded and an office opened in Buffalo. To-day, three of the largest and finest warehouses in the world, devoted exclusively to the packing of tea, stand as a memorial to the founder—located in Toronto, Montreal, and in Boston.

The Canadian market was then controlled by China and Japan teas—the largest sale being China tea of poor quality. These teas were being sold from chests, exposed to air, dust, dampness, foreign odours, and so forth, all detrimental to the quality of tea. In England, which was and still is the greatest tea-drinking country in the world, Ceylon and Indian teas of fine quality had practically displaced China teas, and it occurred to Larkin that Canadians also would prefer these finer teas. He, consequently, introduced a Ceylon and Indian blend to the Canadian market. He then conceived the idea of packing it in metal packages, in order that it would reach the consumer in the same fine and quality unimpaired by dampness, store odours, etc. This step revolutionized the tea market on this Continent.

He sought a name for his product and decided on "SALADA" which was the name of an old Indian tea garden. All that was left now was to tell the public about it. He wisely decided that the quickest and cheapest way to do this was by means of the newspaper. The result was so gratifying that he continued to use the newspapers as his chief advertising policy from the day.

He strove always to give the public the finest quality tea he could at the price and then advertise it for the benefit of the achievement is the largest selling package tea in North America.

A Prison De Luxe

New York Has Last Word In Detention Houses

New York papers gave a lot of space the other day to the opening of a new prison. It was, in fact, a considerable social event, and one Colman reporter wrote that "the list of guests would do credit to one of society's best publicized debutantes." This, it appears, is a sort of prison de luxe. Erected on Manhattan's Welfare Island, it is to be a house of detention for women, and, judging from the description, it will never be much bothered by attempted escapes. Hot and cold water in every cell, shower baths, metal mirrors, a radio in every ward, the blessed pipe sounds as palatial as one of Canada's new observation cars.

Douglas' Egyptian Liniment is a quick, reliable remedy for Hives or Thrush. Four or five applications are usually enough.

Consider the Dandelion

It never fails to arrive on time. Whatever its environment, it gets to the top.

Whether in a lawn or a hayfield it rears its head above all surrounding vegetation.

It does not submit to circumstances. It overcomes them.

It refuses to accept defeat. If cut down it rises up again.

It thrives on difficulties.

It is a moral proof that "yellow" is not the color for a quitter.

In 1920 the total number of deaths from cancer was 111,569.

Reduced Freight Rates

Lower Rates For Livestock In Quantities Less Than Full Carload

Reduced freight rates for the movement of livestock in quantities less than full carloads are being established by the railways, according to an announcement made by the Canadian Freight Association. "Heretofore a livestock shipper has been required to ship or pay for 20,000 lbs. in the case of cattle, and 16,000 lbs. in the case of hogs and sheep in order to ship under the carload rates.

The new schedule will provide for additional rates subject to minimum weights of 12,000 lbs. and 6,000 lbs. in the case of cattle, and 11,000 lbs. and 6,000 lbs. in the case of hogs and sheep. The rates for the smaller car lots are somewhat higher than for the full cars, but they will give the shipper, who has not sufficient stock available to make up full cars, an opportunity of getting the smaller quantities to the markets by rail.

The new rates will apply to market centres from points in the prairie provinces within a radius of 200 miles.

It will be permissible for cars to be stopped at one intermediate point in transit for completion of load at a charge of \$3.00 per car. In making the announcement, the Canadian Freight Association stated that the new rates are in the nature of an experiment for one year.

Passengers Mostly Men

Family Trips To Europe Are Off For Present

When a liner from the United States docked at Liverpool the other day there were 1,068 passengers, and it was remarked by officers of the boat that nearly all were men. One of the male passengers offered no explanation, stating that most of the men were just taking a week or ten days in Europe for a little holiday, and some of them were looking after a little business at the same time. It had become necessary to leave the women at home and family trips to Europe were off for the present.

Buy Locally

Keep in mind the fact that when you are in need of anything it pays to give that business to your local merchant. If your purchase should for any reason prove unsatisfactory you know where you will find him to get the mistake rectified. The door-to-door salesman is here today and gone tomorrow, and has no stake in the municipality. Why patronize him?

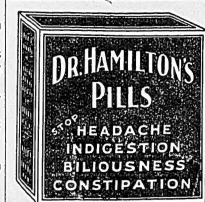

Eager For Knowledge

An increase of 30,000 readers in Toronto Public Library, presumably due to unemployment, is a sufficient answer to the frequent query, what would workmen do with the leisure hours of work would give them. The workman is just as eager for knowledge as the millionaire.

Unless worms be expelled from the system, no child can be healthy. Mother's Own Worm Expeller is an excellent medicine to destroy worms.

The pyrrhic owl of the Rocky Mountains region is not much larger than an English sparrow.

Slam has a new tax on salaries.

W. N. U. 1947

Disarmament Responsibility For Its Ultimate Solution Rests Primarily With the Great Powers

Disarmament was a political problem and the responsibility for its solution rested primarily with the great powers, Sir George Perley, declared at Ottawa, Sir George, who headed the Canadian delegation to the Geneva disarmament conference, was addressing a joint gathering of the Ottawa branch of the League of Nations Society, the National Council of Women, the Women's Canadian Club of Ottawa, and the Canadian Club of Ottawa.

Efforts towards that end, he stated, had been initiated and carried on at Geneva by private conversations among the representatives of the nations chiefly concerned. Many things had occurred to interfere with and prevent the success of the recent deliberations. There were the elections in France; the illness of Premier Ramsay MacDonald; the necessity of United States Secretary of State Stimson returning to his country; the precarious position of the then German Chancellor Herr Brüning which had only recently resulted in his resignation. Much had been done in spite of circumstances, Sir George said in voicing his belief in the work of disarmament and the League of Nations.

A most important resolution on qualitative disarmament had been passed at the Geneva gathering by unanimous vote to the effect that any armaments which were found to be either aggressive in character or particularly dangerous to the civilian population should be removed from national control.

The technical work of the conference was still progressing, Sir George stated, and political conversations would be resumed later when it was hoped conditions would be more propitious for further progress towards the objective which all so greatly desired.

"Education and not emotionalism must be the broad, fundamental basis for the development of international good will leading to permanent peace and to disarmament," declared Miss Winifred Kydd, Montreal, president of the National Council of Women of Canada, and one of Canada's three delegates to the conference.

Miss Kydd dealt with the preliminary work of the Conference sub-committee on moral disarmament of which she was a member, having as its object an intensive study of how the public opinion of all countries of the world may be mobilized in the interests of peace. The moral disarmament committee, Miss Kydd indicated, intends to utilize the press, the radio and the moving picture in its peace propaganda work.

Referring to the presentation of the petition for world disarmament at the conference, Miss Kydd stated that the Canadian petition, bearing 500,000 names, was given a prominent place when the petitions from all countries were placed on display.

Interesting Discovery

By Archaeologist

Finds Another Secret Passage In Old Palestine City

Sir Flinders Petrie, the veteran archaeologist who has unearthed so many of the secrets of the past, is still actively excavating at Gaza, the great city of Palestine which was well known to Abraham. The latest announcement in connection with his work is the discovery of another secret passage leading from the city out into the desert. A great tunnel, leading under the walls and nearly 500 yards out into the desert, was found last year, and constitutes but one of the many features of the fortified city which military experts do not yet fully understand. Sir Flinders estimates that it will take another 50 years to excavate the area yet to be explored.

Hatless Diver: "Funny, I have the feeling that I have forgotten something!"—Musket, Vienna.

Making Final Test

Rust-Resistant Varieties Of Wheat Being Tried Out

For the purpose of considering and advising upon the solution of urgent problems of agriculture in all the major divisions of Canada—the Maritimes, Quebec and Ontario, the prairies and British Columbia—the newly-formed national advisory committee on agriculture of the National Research Council met in Ottawa.

Dr. H. M. Torg, president of the council, stressed the need of co-operation and co-ordination in working out national problems.

Dr. Robert Newton, acting director of the division of biology and agriculture, recounted the enormous progress made in the last decade, through research organizations working in co-operation.

He stated that rust-resistant varieties of wheat from all the agencies which developed them have been pooled for final test. Those selected are being tried out at numerous points, and the resulting grain is to be studied by laboratories of the Dominion Department of Agriculture and the three provincial universities in the west.

The grain research committee since its inception has undertaken several major special investigations. Dr. Newton said there was now in press the final report on the investigation of the drying of grain "which should clear up all points likely to arise."

Numerous complaints regarding the effect of the combine method of harvesting on grain have resulted in the inauguration of an elaborate investigation.

Scottish Market For Cattle

Good Prices Are Obtained For Cattle Shipment From Saskatchewan

Higher prices than anticipated have been realized on the first shipment of Saskatchewan cattle to Scotland, according to a report received by the Department of Agriculture from G. B. Johnson, Canadian Trade Commissioner at Glasgow.

The Scottish market offers a good demand for choice steers, weighing from 10 to 11 hundred weight, capable of being made into prime beef with three or four months' fattening, according to Mr. Johnson. The market absorbs many of this type between April and July. In the spring season, and from September to December, in the autumn.

Grow Fat and Laugh

According To London Doctor Laugh Comes Second

Having believed for so long in the advice, "Laugh and grow fat," we must change our ideas according to a London doctor, who finds that the growing fat precedes the laughter.

From his study of children he has found that fat babies are the happiest, good temper runs in families and girls have better tempers than boys.

So there goes by the board that other belief that the fat man is good-natured because he is too stout either to quarrel or run away. He just can't help his happiness and serenity.

Funds Quite Safe

Business was over for the day and the two partners had adjourned for a game of snooker in a nearby hall. As the evening was nearing its end and they were preparing to go home one of them clapped his hand against his brow and emitted a shrill scream.

"We're ruined! We're ruined!" he shrieked. "I just remember that I left the safe door open when we closed the shop."

"Oh, that's all right," replied his business mate easily. "We're both here, ain't we?"

B.C. Salmon

British Columbia's output of canned salmon in the five-year period, 1927-1931, averaged 1,540,744 cases annually. Despite the fact that market conditions resulted in the 1931 output being much below normal, the average production in 1927-31 was only 92,000 cases below the average for the preceding five years.

In 1339 half of England's troops were archers, and by 1390 practically all of the archery troops were mounted. The men used a bow about five feet in length, and a three-foot arrow.

Springs hold a spoon on a French inventor's device to be clipped to the edge of a kitchen utensil.

Refitting Old Vessel

Clipper Ship Built In 1876 Will Sail Seas Again

The day of wooden ships and iron men has not yet gone by. The bark "Coriolanus," once "Queen of the Jute Clippers," has sailed for Bath, Me., to be fitted out in the same powerful square rig in which she established a sailing record between London and Calcutta years ago.

Refitted, the then full rigged clipper ship will sail out of Boston to again engage in trade with Africa.

She has sailed under six flags over the seven seas. Her prow has churned waters of the Arctic and the tropics and she has survived hurricanes and fire at sea to become last of the old New England clipper ships still in service.

A syndicate headed by C. Nelson Rogers of Boston recently purchased her and she will return to that port immediately after her new spars have shipped into place at the Bath Iron Works, Bath, Me. At Boston she will take on a cargo for a trading voyage to Africa.

She was built at Dumbarton, Scotland, in 1876, and was awarded a gold medal by the Honorable Shipwright's Guild of London for the most beautiful lines of any clipper ship then afloat. The "Coriolanus" established a record of 89 days between London and Calcutta and the record has never been lowered by a sailing ship.

In recent years she has engaged in the packet trade between New Bedford and the Cape Verde Islands.

Forage Crop Regulations

Rule Governing Production Of Registered Seed To Apply

Regulations governing the production of registered seed in future will apply to forage crops, delegates to the annual convention of the Canadian Seed Growers' Association decided. A complete set of rules, for immediate use, was adopted at the meeting held in Winnipeg.

Notices given in the recommendations mention approved methods of designating strains of forage crops progress in the registration of corn and red clover, and recognition of strains and specified types within varieties of forage crops.

Cost Of Horse Labor

Records Show Cost Of Work Horses At Six Cents Per Hour

The Superintendent of the Federal Experimental Station at Indian Head, Sask., has provided some interesting and timely information about the seasonal cost of work horses under prairie conditions.

From the records kept in connection with seven head the average cost of feed for the season of active farm operation was \$22.15, while the average number of hours worked was 1,849, which represents a work value, on the basis of 6 cents per hour, of \$130.88.

Still Ding Good Business

That the horse has not been replaced by machinery on modern farms is shown by the fact that the Canada Wood Specialty Company of St. Marys, Ontario, is now filling an order for 75,000 curry comb handles. The curry comb is used principally for cleaning horses, though quite a supply goes to fishermen. An average of about 500,000 are sold annually in Canada.

Arsenic can be used advantageously in wood preservation processes.

QUEEN MARY ADMIRES BEAUTIFUL SHOW

One of the annual events in London which their Majesties never miss is the Chelsea Flower Show, where some of the most beautiful floral displays in the British Isles are on view. This photograph was taken as Her Majesty left the Royal Party to admire a particularly attractive corner of the show.

472 CUTE ONE-PIECE DRESS MADE IN JIFFY

Has bloomers to complete it. And wouldn't you, if you were a tiny maid, love this little outfit. It is light blue linen with white dots, white contrast and white ball some button trim.

The scalloped caped sleeves are cute idea. Don't you think? And it's such an easy dress to make and to launder.

The matching bloomers are gathered into knee bands. They have elastic at the waistline.

Style No. 472 is designed for sizes 2, 4 and 6 years. Size 4 requires 2 1/2 yards of 35-inch material with 1 1/2 yards of ribbon.

This darling play outfit can be made of sturdy gingham in checks, stripes or plain pastels with white pique trim.

Battiste prints, dimity prints, pique, percales and dotted swiss are suitable and popular for this cunning model. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Will Use Rubber Bayonets

Sixteen hundred rubber bayonets, exact replicas of those used by British troops in a battle with Russian infantry on the slopes of Inkerman in October, 1854, are being manufactured by a British firm for use in a Crimean fighting scene which will be part of "The Aldershot Tattoo," to be staged at Rushmore Arena. The bayonets are said to look exactly like the real thing with their silver-grey blades and black handles.

It took George Forbes, of Ripon, Wisconsin, only two weeks to build a seven-foot model locomotive, in which only steam pipes and rods are of metal.

Emissaries Of Scottish Commerce Receive Splendid Reception On Their Recent Visit To Canada

When the emissaries of Scottish commerce and industry came to Canada recently, they found the opportunities for developing markets here so much more promising than was anticipated that some fifty per cent. of them extended their stay from the scheduled five days—May 16 to 21—to several weeks. Homeward bound, therefore, the Scottish Trade Mission mustered a greatly reduced personnel, some of those who remained behind having decided to traverse the Dominion to Vancouver, others, to further cultivate and solidify valuable connections made in the St. Lawrence port city.

Nor did all the exhibits so carefully selected and arranged to impress the Canadian public with the quality of Scotland's products return to the warehouses of Glasgow. A number of the exhibitors made direct sales of all the stocks they brought with them for show purposes. The representative of Mr. Robert Chapman, dog fancier, set the pace in this field, disposing of the dozen aristocratic Scotch terriers which he brought over on the first afternoon that the exhibition was open to the public.

Direct sales were of course a small factor in the success of the Trade Mission, nor did orders booked constitute the most significant feature of the venture from the point of view of Scottish commerce. The visiting traders, all keen business men trained in a hard school, were quick to realize that the Dominion held for them big opportunities for future business. They found that Canada was a potential buyer worth courting.

"Scotland has found that the day of the buyer going to the seller is past and that the seller must come to the buyer," commented Mr. A. M. Wiseman, British Government Trade Commissioner at Toronto, when asked his opinion as to the most significant result of the Trade Mission visit.

But the discoveries were not all for the visitors. Canadians—not only the general public which regarded the exhibition primarily as a colourful spectacle—but hard-headed business men who visited it to weigh values both of goods and men, were convinced that Scotland produces certain commodities in higher quality than can Canadian producers at present at least, and that these commodities fill a legitimate demand in the Canadian market without unduly prejudicing native products. They heard that if they would continue to sell farm produce, raw materials and certain manufactured goods to Scotland, they should also be ready to buy those goods for the production of which the old land is particularly suited, either through natural conditions such as climate or the long experience of her craftsmen handed down from father to son for generations.

Mr. James Craig, president of Colville's Limited, a famous Scottish industrial firm, emphasized this last point in an address to Montreal business men gathered to welcome the mission.

"The trade between Montreal and Glasgow cannot continue a one-way trade," he stated. "All that Scotland seeks is a reciprocal trade. Canadians must realize that they have to buy in Glasgow if they would continue to sell there."

Those in charge were not merely business men, anxious to seize on any possibilities of a sale. They were representatives of the old historic Scotland, eager to tell her romantic story, to welcome those of Scottish descent, and they were legion, and give them news of home. Afternoon and evening they were besieged by men and women who sought help in locating the tartan worn by their forefathers. They became the centres of impromptu re-unions of Scotch-Canadians, many of whom allowed the highland accent to regain temporarily a dominance in their speech which it had lost long years ago.

Referring to this cordial atmosphere, a remark made by Mr. Wiseman, British Trade Commissioner at Toronto, who was sent over to Scotland to cross the ocean with the Trade Mission and was closely associated with it throughout its stay here, is significant.

"Had the mission come here purely on a hard business basis it would not have met with anything like the success it attained," he commented in the course of a personal interview. "It was lifted to a higher plane by the spirit in which it set out and the spirit in which it was received here. It may be said that the spirit of Scotland was strikingly personified in the honorary president of the mission, His Grace the Duke of Montrose, whose presence contributed greatly to the

splendid impression left in Canada by the Scottish Trade Mission."

Clad in kilts and sporrans and the plaid of the ancient clan of Graham and wearing, among other insignia, that of the Knights of Nova Scotia, indicating the part which his ancestors played in the colonization of Canada three centuries ago, the Duke captivated Canadian business men when the members of the mission were hosts to leading Montrealers and statesmen and trade officials from the Dominion capital—Agricultural and Industrial Progress in Canada.

Norfolk Fishermen

Are Superstitious

Claim Weather-Vane Depicting Crow Brings Bad Luck

Mariners are notoriously superstitious.

The local governing council of Cromer, the agreeable little town on the Norfolk coast, is respecting the superstition of the local fishermen in regard to a weather-vane depicting a large crow which was erected recently by the council. The fishermen say the weather has been consistently bad since the vane was put up, and they have not been able to catch so many crabs and lobsters. The crow, they assert, is "a bird of ill-omen," and an emblem of death.

In deference to these representations the vane is to be taken down and a new one, depicting a ship in full sail, is to be set up.

Standardized Automobile Insurance

New Plan Comes Into Effect In Ontario This Year

Standardization of automobile insurance policy forms becomes effective in Ontario September 1, the provincial insurance department announces.

The insured motorist will be automatically responsible to his victims under the new regulations. The standard cover that every company shall be liable to the victim of an accident under all circumstances. If the policy holder has violated the statute, the company must seek redress against him.

Encouragement Needed

To Attract Incoming Cargoes To Port Of Churchill

The opening of ports on the Gulf of Mexico did not hurt, but rather helped, United States Atlantic ports, and there is no reason to believe that the opening of Churchill will injure any other Canadian port. Unfortunately, there are always short-sighted people who do not see it that way, and Churchill will continue to receive adverse publicity from English Canadian sources. To offset that publicity some special encouragement should be given to attract incoming cargoes to Churchill.—Winnipeg Tribune.

Gravity Comparisons

Measurements of the force of gravity at various points throughout the country are made by the Dominion Observatory, Department of the Interior, Ottawa. This involves the measurement of the period of a pendulum to one ten millionth part of a second—a decidedly delicate operation. Results of these investigations are intended to throw light on the nature of the upper layers of the earth's crust, and are closely related to geological formations and structures, and such processes as denudation and mountain-building.

Two New York architects have designed nine-story apartment houses supported on piers, leaving open spaces for children's playgrounds on the street level.

"What do you say to your wife when you go home late?" "I say 'Good Evening' and she says the rest."—Hummet, Hamburg.

PURELY VEGETABLE

Act gently but surely on both liver and bowels

Safe for **CHILDREN**

Sold everywhere in 25c and 75c red pkgs.

CARTER'S

WORLD HAPPENINGS BRIEFLY TOLD

The National Government has contracted with a group of former military aviators to develop a Chinese air force.

Amelia Earhart received the Order of Leopold from King Albert of the Belgians in recognition of her solo flight across the Atlantic.

On her first trip through the Strait of Belle Isle this season, the Canadian Pacific flagship "Empress of Britain" again broke the record for Atlantic crossing.

Col. Herbert Swinford, veteran of the Red River Rebellion in 1870, and the North West Rebellion 15 years later died in Winnipeg at the age of 83.

Prof. J. W. Gregory, Scottish geologist, and head of a scientific expedition studying earth movements in the Andes, was drowned recently, a brief wireless report said.

The total value of output of the British Columbia Fisheries in 1931 was \$11,109,822, compared with \$23,103,302 in the preceding year. Fisheries, according to a report issued by the Dominion Bureau of Statistics.

The fruit bill of the United Kingdom went up by nearly \$32,000,000 last year, according to a report issued by the empire marketing board, with oranges for the first time in history proving the popular leader. Apples, millions of which came from Canada, were second.

Nearly 7,000 persons were killed and more than 20,000 injured in road accidents in England within the last twelve months, according to parliamentary returns. In London Metropolitan Police District alone, 1,326 persons were killed and more than 5,000 injured.

British Columbia lumbermen will send a trade delegation to China to foster trade with that country if a suggestion put forward by Hon. Nelson Lougheed, Minister of Lands, to the executive of the British Columbia Lumber Manufacturers' Association is adopted.

Not Much Difference

Vegetarians Healthy But Slow In Generating Body Heat

Experiment running over two years has been concluded at Kansas City where a professor has been observing 70 vegetarians and comparing them with meat eaters. He finds that the vegetarians do not generate body heat and energy as quickly as meat eaters, placing the difference at 10 per cent. The vegetarians, he said, do not appear to be more active or intelligent than any others, nor are they more apt to become sick. Apart from generation of heat he could see little difference in the two plans of diet.

New Discovery Valuable

Makes It Possible To Evaporate Platinum Like Water

Platinum is caused to evaporate like water by a discovery announced from the California Institute of Technology. This precious vapor, probably the world's highest-priced mist, condenses into unimaginably thin films upon a wide variety of materials. It coats them virtually permanently. Smoother than dew it will cover fibres, converting them into plant, filmy threads that seem made of pure platinum.

"Is your daughter going to practice on the piano this afternoon?"

"Yes."

"Well, then will you please lend me your lawn mower? I have to do the lawn some time, anyway."

PERSONAL

SCOTTISH LADY AT PRESENT IN Canada, would like to take in charge one or more young ladies. Has experience in travel abroad, and with Canadian girls. Could act as companion to lady, in any part of Canada, or as travel companion. Has excellent testimonials both in Canada and in Britain. Would willingly give more information to interested party.—Apply Box 50, Winnipeg Newspaper Union, 175 McDermott Ave., East, Winnipeg, Man.

W. N. U. 1947

Had Original Ideas

New South Wales Bandits Out After Dig Booby

These are days of mysterious accidents, peculiar robberies and dastardly crimes of all descriptions. But one could not help but smile at the news despatch from Sydney, N.S.W. These bandits stole a brick wall 30 feet long and six feet high. Others took 30 locomotives all excepting the frames, while still others carried off part of a church. This story is somewhat along the lines of one of the "rackets" in the United States where high-pressure thieves will hack a moving-van up to a home or an apartment and if nobody stops them, take the entire furnishings in one trip.

Keeping one's possessions is not as easy as it used to be, not even as easy as in the days when might meant right.

Leadership Of Prince

Heir To British Throne Is More Than Theoretician

Because of his commanding position as heir to the British Throne and on account of his personal popularity, the Prince of Wales has an unusual opportunity for public service of a practical nature, and of this opportunity he is taking full advantage. He is more than a theoretician, and whether his audience be composed of business men, industrialists or farmers, he speaks to them in their own language. They realize that he has made himself familiar with their problems. Leadership is the great need of the day, and this his Royal Highness is providing in an energetic and practical manner.

A BOON TO STOUT WOMEN—THE ADJUSTABLE SLIP

Its wrap-over front makes it shadow proof.

There isn't anything more essential for a slender appearance than a well-fitting costume slip.

Today's model reduces the breadth of the figure and does it gracefully. There is a narrow sash that slips through a bound opening at the right hand side of the front. It is brought around the back and tied in a bow, adjusting the slip to suit its wearer.

The wrap-over fronts allow plenty of freedom for the hemline, and still retain the straightline of the slip.

And to make it! You'll be amazed at its simplicity. Cut it out and practically only edges to be bound, after the sides and shoulder seams are closed.

Styles N. 522 is designed for sizes 36, 38, 40, 42, 44, 46, 48 and 50 inches bust. Size 38 requires 4 1/2 yards of 36-inch material.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

WRITING WINS AUTOMOBILE

F. L. C. Bond, general superintendent for C.N.R., Montreal district, congratulating C.N.R. brakeman Donat Cyr, of Montreal, after Cyr has received a new automobile—the prize he won when F. D. Jacob, for 15 years Dominion Graphologist, and other judges decided Cyr's writing was more interesting than any of the thousands submitted in the Imperial Tobacco's first series of contests wherein competitors wrote on the inside surface of Turrel cigarette packages. At the left is W. B. Tingle, director of the tobacco company; A. Desrosiers, also of the Imperial Company; J. E. Gibault, superintendent for C.N.R., Montreal district, and the winner himself, hatless.—Photo, Canadian National Railways.

Contract Bridge

By Hamilton B. Hatch, Cavendish Club, Toronto

In my last article, I discussed the Official System of Contract Bridge from the standpoint of the fundamental differences between it and the Approach-Forcing System. Today's article has to do with the so-called One-Over-One variation of both these systems. The One-Over-One has been developed by Geo. Reith of the Knickerbocker Whist Club, New York. Many of the members of the club have assisted in bringing this system to its present state of excellence. The Four Horsemen of Bridge, i.e., Hal Sims, David Burnstine, Willard Karn, and Oswald Jacoby use this system and have won many national and sectional championships. Whether their winning has been due to the One-Over-One or to the fact that all four of these men are master players, is not certain. However, it is probable that the system has helped them materially in their successes.

The salient features of the One-Over-One are as follows:

1. The Opening Bid of One has practically the same minimum requirements as The Approach-Forcing System, with the exception that with strong distributional hands, i.e., two suits, the bidding may be opened with less than two and one-half honours or tricks. An example of this opening would be the following: Spades A J 9 8 7, Hearts K Q X X X, Diamonds X, Clubs X X.

- 2nd. Provided there is no intervening bid and the partner of the opening bidder responds with a bid of one, other than one no trump, this response is definitely forcing and demands that the original bidder keeps the bidding open for at least one more round. The difference between the Approach-Forcing and the One-Over-One is, that any bid which is forcing in the Approach-Forcing System requires that the bidding be kept open until a game contract is arrived at while the One-Over-One forces only requires that the bidding be kept open for at least one more round. Example: If the opening bidder bids one diamond and second hand passes, then if the opening bidder's partner bids one heart, the original bidder must bid again. The advantages claimed for this system by its advocates is, that the partners inform each other of their respective holdings at low bids, and, also that this bidding conceals from the opponents both the strength and weakness of the bidding hands. Where the hands are strong there is always the chance that the opponents will make a defensive bid and find themselves caught between the upper and nether millstones with the result that they suffer a substantial penalty.

3. The opening bid of two in a suit is based on losing tricks and not on honor tricks. In other words a two bid is made on hands which definitely assure the partnership of game even if the partner of the two bidder has a complete "bust." The type of hands which lend themselves to this bid are usually powerful two suited or a very powerful one suited. Example: Spades A Q J X X X, Hearts A K X X X X, Diamonds—None, Clubs X. In this hand even with a six spot high in partners hand game is assured, as the original bidder has only three losing tricks.

4. The opening bid of three in a suit is a definite slam signal. It is a stronger bid than the two bid and demands that the partner of the three bidder bid a suit of which he has the ace. If he has no ace, he makes the conventional response of three no trump.

Example: Spades A K Q J X X X, Hearts K Q, Diamonds X, Clubs A X

Q X. If after a three spade bid the response is four diamonds slam is definitely assured in spades. This is the only situation in any of the systems so far discussed where ace showings is countenanced.

4. In all other situations except those outlined above, the One-Over-One has no variations of consequence from the Approach-Forcing System. The weak no trump response is used to show a balanced one to two trick hand. All no trump bids other than jump no trump and original no trump are used to definitely measure your quick trick strength and in almost every case the no trump bid shows a minimum holding. However, in the One-Over-One, many users of the system make an opening bid of one no trump on a strong hand. If one no trump is bid and partner responds with two no trump the original bidder guarantees enough extra value to rebid to three. In other words the contract is either one no trump or three no trump. The hand, provided there is no adverse bid, is never played at two no trump. In suit bids if the opening bid is one heart and partner responds with two hearts the original bidder either passes or bids four hearts, never three. In major suits therefore where no interference bidding occurs, the contract is either two or four. In the minors it is either two or five.

It is probable that the intelligent use of this system requires greater experience than the use of the other systems. It is certain, however, that in the acid test of keen duplicate competition, the users of this system have been extremely successful. Whether their winning is due to the system or to the fact that they are master players is, among users of the other systems, a mooted question.

The next article will deal with variations and their variations.

Recipes For This Week

(By Betty Barclay)

OATMEAL COOKIES

- 1 1/2 cups special cake flour, sifted.
- 2 teaspoons baking powder.
- 1/2 teaspoon salt.
- 2 teaspoons cinnamon.
- 1 teaspoon cloves.
- 1/2 cup butter or other shortening.
- 1 cup sifted brown sugar.
- 1 egg, well beaten.
- 1 1/4 cups oatmeal.
- 1/2 cup milk.

Sift flour once, measure, add baking powder, salt, and spices, and sift together three times. Cream shortening, add sugar gradually, and cream well. Add egg. Add oatmeal and flour, alternately with milk, mixing well. Drop by teaspoon on greased baking sheet and bake in moderate oven (350 degrees Fahrenheit) 18 to 20 minutes. Makes 4 dozen cookies.

COCONUT BLANCMANGE

- 5 1/2 tablespoons flour.
- 1/4 cup sugar.
- 1/2 teaspoon salt.
- 2 cups milk, scalded.
- 1 cup coconut, premium shredded.
- 2 egg whites, stiffly beaten.
- 1 teaspoon vanilla.

Combine flour, sugar, and salt. Add milk gradually, place in double boiler, and cook until thickened, stirring constantly. Add coconut and cool. Fold in egg whites and vanilla. Chill. Garnish with tart jelly. Serves 6.

Proof Positive

Man: "Do you think the dead can communicate with us?"

His Friend: "I know they can't. Once I managed to borrow a fever from a Scotsman. A week later he died. I haven't heard a word since."

FAVORITE CHARACTERS IN GENESIS

Golden Text: "We know that to them that love God all things are together for good, even to them that are called according to His purpose."—Romans 8:28.

Devotional Reading: Hebrews 11:4-22.

Lessons From the Life Of Abraham.

The importance of Abraham is evidenced not only by the number of chapters in Genesis devoted to his life but to the many references to him and his faith, both in the Old Testament and the New. Faith was the outstanding trait of Abraham. He was the first, as far as we know, to see life as a venture with a purpose. He knew God and communed with Him, and his beautiful life is "The Friend of God."

"Jehovah appeared to Abram, and said unto him, I am God Almighty." In the story of Abraham we see the belief in one God displacing the universal belief of his time in many gods. In the words of Basil King: "To Abraham the new understanding came as a great marvel. With a God who is Almighty anything was possible. It was more than a conviction, more than an enthusiasm; it became a burning and consuming faith which he could test to any extremity. He could trust it to the uttermost."

To Abraham message followed message, as great perceptions broadened into greater ones. He learned that gain on his own personal account was but gain for the world at large. He was the first altruist we know of anything about, the first to whom the good of his fellow-men was as dear as his own good. Good for himself could only be good in proportion as they, far into the future, should share it. Because he obeyed the Voice, not only he but others were to benefit. That a single right act is an universal asset, in which, to its degree, all the nations of the earth share, he blessed, was one of his great discoveries."

Life Has Been Exciting

Eighty-Five-Year-Old Englishman Cautious Complains Of Monotony

Sir Claude Clouston De Crespigny, who has the distinction of having served both with the Royal Navy and the Army, entering the Royal Navy when only 13 years of age, has just celebrated his 85th birthday. Sir Claude is feeling much better this year than last. With Lady De Crespigny he has just returned to England from a six-week trip to the West Indies, and that has done him both a lot of good. He does not feel any ill-effects from the fourteen bones which he is said to have broken during his many years of sporting activities. He broke two legs while ballooning, three ribs at steeplechasing, three fingers when boxing, another rib through a horse's kick, and was once nearly scalped by a favorite monkey. "One of my tightest corners," he has said, "was when I jumped into a river infested with sharks to save a man's life." Once, long ago, Sir Claude fought a waterman with bare fists for an hour and a half, and although two of his fingers were broken he did not stop until the police arrived. Sir Claude has also fought a python, escaped from a tiger, flown the North Sea in a balloon, and climbed steeples. His house is full of trophies and medals which he has won.

Lack Representation

Federal Government Has Low Percentage Of Farmer Members

In the Senate of Canada there are 95 members, and of these but 11 are farmers. With 46 per cent. voting population the rural constituencies have but 12 per cent. representation in the Senate, and 15 per cent. in the House of Commons. So that the basic cause of the little attention paid to farmers' complaints and to agricultural interests lies in the lack of representation. A profession which represents the largest percentage of any profession within the country is not organized, and it is pitted against the most highly organized unions and professions of other kinds.

Reason Is Obvious

An eminent American lawyer went to London recently to study the British legal system. An equally eminent English lawyer undertook to show him round the Law Courts. They listened to cases, and the Englishman explained all the fine points of the administration of British justice. The American said afterwards: "There is no doubt that your system is better than ours. But I cannot understand why. After all, in America we have got the very best judges that money can buy."

Claims Largest Dog

The Rev. J. Gard, Baptist minister at Istobek, Leicestershire, England, claims ownership of Britain's largest dog, an Irish wolfhound. Three feet high at the shoulders, and weighing 184 pounds, the dog is as large as a donkey.

NEURITIS HAS GONE!

Banished by Kruschen

"I had acute neuritis in the shoulder and left arm, due to exposure in bad weather," writes the Rev. H. E. T. "It was impossible to lift the arm, to dress or to use it in any way, and, of course, the pain was dreadful. All external applications were useless. I got it completely normal again by keeping the parts affected warm and taking daily, early in the morning, Kruschen Salts in a tumbler of hot water. It took nearly a month, but every vestige of neuritis has gone."

Neuritis is typical of a dozen other complaints—some minor, some very serious—which all result from impurities in the blood. And it is impure blood, circulating all over the system and setting up inflammation in the tissues, that causes these excruciating pains.

Kruschen Salts can be safely trusted to set a new blood in motion. Kruschen contains just what Nature needs to persuade your internal organs back into a healthy, normal condition.

Entirely New Reason

For Atlantic Flight

Doctor Hopes To Obtain Valuable Information As To Strain Imposed on Aviators During Long-Distance Hops Is to Be Undertaken Shortly by a New York Physician, a Veteran Commercial Pilot and a Girl Who Holds a Limited Commercial Flying License.

The three are planning to fly non-stop from New York to Rome in the plane which Clyde Pangborn and Hugh Herndon used in their flight around the world.

Dr. Leon Fisculli, of New York, founder of the Flying Nurses' Association, will be a passenger. William Ullrich, of Mineola, L.I., will be chief pilot, and Miss Edna M. Newcomer, of Hampton, N.Y., will be co-pilot. Miss Newcomer plans to make a parachute jump over Florence, Italy. Dr. Fisculli intends to place both Ullrich and Miss Newcomer on a rigid diet before the flight. He hopes to obtain valuable information on stamina, fatigue, diet and sleep schedules.

The plane is being conditioned at Roosevelt Field.

In Search Of Treasure

British Adventurers Locate Suspected Spanish Galleon In Southern Seas

A band of British adventurers who are seeking Spanish treasure made recently, with a galleon on the bed of Chaguramas Bay, Trinidad, which, they hoped was crammed with gold ingots and precious jewels. The operations have been directed by a "divining spring" owned by Frank Cooper, one of the leaders of the group, who crossed the Atlantic recently in the "Vigilant," a tiny vessel, in the hope of making a great fortune.

It was reported that as the "Vigilant" was circling over the bay, the "divining spring," held in Cooper's clenched hands, leaped from his grasp.

Chaguramas Bay has long been looked upon as a place where treasure might be found. It was there that the Spanish were defeated by the British in a decisive naval engagement near the end of the eighteenth century. The legend is that the Spanish fleet contained one vessel loaded to the rails with gold and gems.

Special Fellowship

Awards Announced

Students Of B.C. and Saskatchewan Are Among Winners

The school of graduate studies in the University of Toronto, has announced awards of special fellowship open to graduates of other Canadian universities. The successful candidates are:

J. R. Daniels Beall and Miss M. J. Fisher, University of British Columbia; H. M. Chisholm, Dalhousie University, Halifax, N.S.; E. O. Bratton, University of Saskatchewan.

Columbus, on his second voyage to the New World, brought sugar cane to San Domingo.

"Have you any brothers and sisters?"

"No, I am all the children we have."—Lustige Kolner Zeitung, Cologne.

GOVERNMENT IS SUSTAINED IN MANITOBA VOTE

Winnipeg, Man.—Hon. John Bracken will be Prime Minister of Manitoba for another five years. The general elections resulted in the return of government candidates on a sweeping scale.

The result of the voting puts the stamp of popular approval on the recent Liberal-Progressive coalition. Col. F. G. Taylor, Conservative leader, declined to join a coalition government when it was proposed by Premier Bracken last autumn. Col. Taylor stands elected in his own constituency of Portage la Prairie, but many of his followers went down to defeat.

Chief opposition to the government was provided by the Conservatives who contested practically every constituency in the province and waged a vigorous campaign.

With 13 candidates in the field, the Independent Labor Party waged a lively fight in Winnipeg and a few other ridings. Early returns showed only one Labor man, John Queen of Winnipeg, elected.

One cabinet minister, Hon. Ewan McPherson, one of the new Liberal recruits to the cabinet, went down to defeat in Portage la Prairie before the popular Conservative leader, Col. Taylor.

Sanford Evans, chief financial critic of the Conservative opposition in the Manitoba legislature, was assured of election in Winnipeg as early returns showed him far in the lead of the other 28 candidates contesting the city's 10 member constituency.

Mr. Evans is one of the best known Conservatives in Manitoba and is known throughout Canada as an authority on grain trade and business statistics.

A. B. Roblin failed in his first attempt to follow his father, Sir Redmond Roblin in a political career. Sir Redmond was the last Conservative Prime Minister of Manitoba, but his son, running as a Conservative in Dufferin, was unable to capture the seat.

Decision Rests With Immigration Minister

Alleged Communists Have No Further Recourse To High Courts

Halifax, N.S.—Fate of the group of alleged communists, who have been detained in Halifax for some weeks while their efforts to evade deportation were before the courts, now rests solely in the hands of the minister of Immigration, Hon. Wesley A. Gordon. It was stated by L. A. Ryan, counsel for the group, that there, but further recourse to higher courts as the decision of the full bench of the supreme court of Nova Scotia had been unanimous.

Arms Conference Has Suspended Activities

Discussions On Disarmament Postponed For An Indefinite Period

Geneva, Switzerland.—Disarmament has been temporarily sidetracked and war debts and reparations discussions came to the fore, almost on the eve of the Lausanne financial conference.

The World Disarmament Conference suspended formal activities for an indefinite period pending private conversations among political leaders looking toward some solution of the disarmament problem.

Prepared For Equalities

Fascists In Germany Will Face War If Necessary

Berlin, Germany.—The German Fascist party "will not shrink war if it is the last means of protecting our political and social freedom," Gregor Strasser, head of the entire organization of Adolf Hitler's party, declared in the first political broadcast since German government has permitted a Fascist to deliver.

"We National Socialists do not desire a new war," Strasser said, "but we will not shrink from war."

Making Maiden Trip

London, England.—The "Georgie," which shares with the "Britannic" the honor of being the largest British-built motorship in the world, will sail on her maiden voyage from Liverpool for New York on June 25. A member of the White Star fleet, she is a 27,000-ton vessel.

W. N. U. 1947

Big Car Contract

Ford Motor Company Of Windsor To Supply English Firm

East Windsor, Ont.—On his return from England recently, Wallace R. Campbell, president of the Ford Motor Company of Canada, announced that a contract had been entered into by his firm with the Ford Motor Company of England whereby the East Windsor plant of the Canada company will supply the English firm with \$5,000,000 worth of Ford V-8 motors during the next 12 months, and with 1,500 to 1,800 complete V-8 cars, scheduled for delivery in July.

The Canadian company will distribute the new 8 horsepower English Ford in its export markets, New Zealand, Australia, South Africa, British India, and other British territories, while the English company will sell the V-8 in Great Britain, Spain, Sweden and other European and Asiatic countries, for which the English Ford company holds selling rights.

Mr. Campbell emphasized that the business was taken at extremely close figure and represents practically 100 per cent. payroll in Canada, not only at the East Windsor plant, but at Toronto and other tire and parts manufacturing centres.

Burial Of Violet Sharpe

Brief Services Attended By The Acting British Consul-General

Englewood, N.J.—Violet Sharpe, English servant girl in the home of Mrs. Dwight W. Morrow, was buried after a brief service attended by several members of the Morrow household and the acting British consul-general who has been instructed to make a report on the girl's suicide five days ago.

The simple cloth-covered casket was borne to a grave in Brookside cemetery, where rests the body of the late Senator Dwight W. Morrow, grandfather of the murdered Lindbergh baby, on the shoulders of four male employees.

No member of the Morrow or Lindbergh family attended the final rites, although they were represented by Arthur Springer, the late senator's private secretary, and Mrs. Josephine D. Graham, Mrs. Morrow's private secretary.

British Immigration

Question Has Not Yet Come Up For Discussion At Inter-Provincial Conference

Edmonton, Alberta.—Commenting on Senator A. D. McLean's suggestion as reported from Winnipeg, to the effect that the question of British immigration to western Canada be considered at the forthcoming inter-provincial conference in Regina, Premier J. E. Brownlee says that he has not had a communication from any source in regard to the matter, and he presumes that if the Dominion government were proposing to put it on the programme for the imperial economic conference advice to the provincial governments would have been given accordingly.

If occasion arises, however, the Alberta Government will be prepared to express its views on such immigration, says Mr. Brownlee.

Bloodless Sea Fight

British Run Runner and U.S. Cutter In Engagement

Halifax, N.S.—Tales of an old-fashioned sea scrap, in which the crews of a British run-runner and a United States cutter battled each other with potatoes, turnips, paint pots and molasses jugs about 70 miles off New York, were told here after the motorships "Ganeff" and "Mary F. Ruth" limped into harbour.

Masters of both vessels claimed they had been rammed by the cutter "Daphne," the "Mary F. Ruth" on Friday, and the "Ganeff" on Sunday. The "Ganeff" had a large hole in her stern.

Advisory Committee

London, England.—The creation of an advisory committee to represent all sections of the British trade to the Imperial Economic Conference at Ottawa was strongly urged by Lord Lovat in the House of Lords. The government's representatives should be adequately informed on the technical aspect of the question, he said.

Will Attempt Speed Flight

New York.—Before taking off for Nashville, Tenn., Cyrus Peabody, a veteran military and commercial pilot, announced that within the next few weeks he planned a speed flight from New York to England, France and Germany.

Hold Station Master

Responsible For Wreck

Death Sentence Imposed and Other Employees Get Prison Terms

Dulopepetrovich, U.S.S.R.—The death sentence was imposed upon the railroad station master at Zebayev and his assistant who were convicted of responsibility for a wreck near the station in which a number of passengers were killed.

It was a head-on collision between two trains and the station master was charged with having misdirected the signals while he was intoxicated. Thirteen other railroad employees, including the crews of both trains, were sentenced to prison terms of one to ten years. One man was exonerated.

Receives Heavy Sentence

Gaston B. Means Convicted On Swindling Charge

Washington.—Gaston B. Means was sentenced to 15 years' imprisonment for swindling Mrs. Evelyn Walsh McLean of \$104,000 in an alleged plan to return the kidnapped Lindbergh baby.

Justice James M. Proctor in the District of Columbia Supreme Court sentenced the former justice department investigator to 10 years on the larceny of \$100,000 ransom and five years for larceny of the \$4,000 expense money. The latter sentence is to begin after the 10-year sentence has been fulfilled.

Demand High Wages

Australian Jobless Refuse Pay Offered By Grape Growers

Sydney, Australia.—The dole has made some of the jobless here rather particular about the kind of work they are willing to accept. At Mudge, centre of the vineyard district, grape growers agreed to give preference of employment in the picking season to local men on the dole. They offered \$2.50 a day with meals and quarters added. The work was rejected.

ST. LAWRENCE SEAWAY ROUTE HAS U.S. SUPPORT

Chicago.—Negotiations with Canada for the development of the St. Lawrence seaway is now at a favorable point according to the administration platform presented to the Republican National Convention here.

The St. Lawrence plank of the party platform reads: "The Republican party stands committed to the development of the Great Lakes-St. Lawrence seaway. Under the direction of President Hoover negotiation of a treaty with Canada for this development is now at a favorable point. Recognizing the inestimable benefits which will accrue to the nation from placing the ports of the Great Lakes on an ocean base, the party reaffirms allegiance to this great project and pledges its best efforts to secure its early completion."

ROME'S "VIVA" TO FAMOUS FILMS

Rome certainly tended an enthusiastic greeting to the aviators from all parts of the world who gathered at the Italian Capital for the recent Conquest of Piers. Sheets of paper were showered on the visitors as they drove in procession. Inset shows Captain Sir Hubert Wilkins (left), famous Australian explorer; General Italo Balbo, head of the Italian Air Forces, and Sir Arthur Witten Brown, who, with Sir John Alcock, was the first man to try to fly across the Atlantic, as they left the tomb of Italy's Unknown Soldier after placing a wreath.

GOVERNMENT ENDORSED

Premier Bracken Of Manitoba

Farm Mortgages

Loan Companies In Alberta Will Not Foreclose Under Agreement

Ponoka, Alberta.—Mortgage companies will not foreclose on any farm mortgages for one year without approval of the Alberta Debt Adjustment Board, and no foreclosures will be made while interest payments are being maintained.

This assurance was given the Ponoka Constituency Association of the United Farmers of Alberta by Premier J. E. Brownlee in addressing the annual constituency convention. Premier Brownlee said the guarantee of the mortgage companies had been obtained.

Besides the promises not to foreclose, arrangements to make payments in grain were being reached.

Gout Theory

New Finding Of Medical Professor Regarding Treatment

Hamilton, Ont.—Radical changes in the attitude of the medical profession towards the treatment of gout may result if the findings of Dr. Under Croft, of Columbus, Ohio, as presented to the American association for the study of gout, receive full acceptance. The prevalent belief that iodine deficiency was the cause of gout has been discredited, Dr. Croft asserts. He declares he has made the discovery of a micro-organism, a small fungus which he believed to be the cause. This fungus is found on all cabbage leaves as well as in the soil of those sections of the land known as goutte belts.

B.C. Forest Fires

Victoria, B.C.—Forest fires are raging in spruce and pine timberlands opposite Douglas Lodge, in the Stuart Lake district of northern British Columbia, and are destroying hunting grounds of Indians in the Fort St. James district. It was reported to the government here.

Open Coastal Service

Vancouver, B.C.—The summer service between Vancouver and Skagway was officially opened by the Canadian National Steamships when S.S. Prince George, Captain Nell MacLean, sailed from this port June 13.

Kiwanis International

Delegates From All Parts Of Canada Attending Convention At Detroit

Detroit.—Canadians from all parts of the Dominion arriving here for the 16th annual convention of Kiwanis International are prepared for four days of problems pertaining to unemployment aid, urban-rural relations, child welfare, adult education, and civic betterment.

Kiwanis was founded in Detroit on January 21, 1915, and the thousands of Kiwanians from all parts of Canada and the U.S. crowding into the city consider the occasion a pilgrimage back to the birthplace of the service organization. "We are justified in our faith in the future of Kiwanis," declared William O. Harris, of Los Angeles, International president, in his annual message. "We can be proud of our past accomplishments, and our present opportunity lies in the willingness to serve in the social and economic problems that we face today."

The Canadian delegations are in charge of three district governors: Charles A. Fowler, of Halifax, N.S., Ontario-Quebec-Maritime district; Dr. James P. Whyte, of Swift Current, Sask., Western Canada district; and Clinton S. Harley, of Seattle, Pacific Northwest district.

Two international officers, Andrew G. Gaul, of Hamilton, Ont., vice-president, and Dr. Charles C. Tatham, of Edmonton, trustee, will take leading parts in the convention.

Over 1,800 Kiwanis clubs across Canada and the U.S. will meet simultaneously. This united fellowship occasion will bring together over 80,000 men for an expression of gratitude for the community betterment and welfare work of Kiwanis during the past year.

All Kiwanis clubs in Canada are observing Canadian citizenship week, June 26 to July 2, with patriotic programs. The observance is being directed by the Kiwanis International committee on public affairs for Canada. H. Stanley Higman, of Ottawa, is chairman, and Nelson A. Harkness, Vancouver, and Richard W. Moore, Saskatoon, members of the committee.

Gold Rush In Manitoba

Big New Strike Is Reported Near Island Lake

The Pas, Man.—Prospectors are flocking to the scene of what is believed a big new gold strike. The find is some 40 miles northwest of Island Lake, where important gold showings were found during the winter. A rush of claim stakers from the Island Lake district followed news of the strike.

Details of the find have not come out, but it is stated samples taken to Island Lake are richer than those from the Kiwanis International area which started a few aeroplane rush from Winnipeg a few months ago.

FOREST FIRES CAUSE HEAVY LOSS IN ONTARIO

Port Arthur, Ont.—The number of men fighting fires in the Thunder Bay area has now reached 700, equal to the largest number employed last year.

Blazes at Whitfish Lake and Obonga Lake are requiring extra care, officials said, and 50 additional men have been sent to Sunday Creek to cope with the rapid spread of fire in that district.

The largest fire in the area is about 30 miles north of Graham, but although it covers about 50 miles of territory, it is not the most destructive being mostly in young growth.

Eight fires at Whitfish, Obonga and Dog Lake, and at Gull River, all men and equipment must be taken in by plane.

Fires to the northwest of Dog Lake, about 20 miles from Port Arthur, destroyed a group of camps of the Pigeon Timber Company valued at \$5,000. A dam which had cost \$8,000 and about 10,000 feet of lumber also fell prey to the flames.

Joseph Marrifield, 55, and Con Mahoney, 22, two members of a fire-fighting brigade, lost their lives in Onion Lake when a canoe in which they were riding overturned.

Sudbury, Ont.—Valuable timber is believed to be endangered by a bush fire which was ravaging some 3,000 acres of bush land near Gogama, north of here, according to word reaching Ontario forestry officials. The blaze is being fought by 200 men. One casualty was reported. Paul Natakata was injured and badly burned when struck by a falling tree.

CONFERENCE AT OTTAWA MAY BE VERY BRIEF

London, England.—The British Government and the governments of the Dominions share the belief that proceedings of the Imperial Economic Conference at Ottawa must not be long drawn out, said J. H. Thomas, Secretary of State for the Dominions, in a statement on the conference in the House of Commons.

"No possible preparatory work has been left undone on this side," the minister said, and if the other had acted likewise the conference would not fall in its task of securing greater and freer empire trade.

Tariffs, the Imperial preference, the nationalization of industries, monetary and financial questions including the whole question of currency and migration, would all be taken up by the conference, said the minister.

"The United Kingdom Government," he declared, "will advocate the establishment of machinery representing the dominions that will keep them in daily contact."

Reconciliation of the divergent interests of the different sections of the empire was a great and difficult task, but a worthy one, which the great mass of people were hoping would be accomplished, Mr. Thomas said. "If we can help each other," he added, "what an example that will be to the world."

Winnipeg Bank Robbery

Bandit Ties Up Staff and Escapes With \$5,000

Winnipeg, Man.—A lone robber entered the Corydon and Osborne branch of the Royal Bank of Canada here just before closing time Thursday afternoon, June 16, securely bound the small staff and made a neat getaway with \$5,000. The robbery was not discovered until one hour later. With the exception of the staff of four the bank was empty at the time.

Nonchalantly strolling up to the teller's window as if to make a deposit, the armed marauder confronted Charles F. Mott, teller, with a revolver and ordered strict silence. He hustled the four employees to the rear of the premises, calmly but efficiently, trussed them up with a coil of whipcord, scooped \$5,000 from the teller's till and then telephoned for a taxi.

One hour later, a passerby noticing the bank doors ajar, paused to investigate. He found the four members of the staff lying on the floor, securely tied.

Hoover Re-Nominated

Carries Republican National Convention In First Ballot

Chicago.—President Herbert Hoover was re-nominated almost without opposition by the Republican National Convention.

In a first ballot walkway endorsement which rallied to his standard all but a handful of states, Hoover received from the party convolve a re-affirmation of the grant of leadership voted him four years ago at Kansas City.

A long, noisy and colorful demonstration had greeted the presentation of his name to the convention, with his home state of California leading the parade.

The re-nomination had been forecast months ago, and it only remained for the assembled delegates to give to their ratification the stamp of unmistakable emphasis. This they did with trimmings.

Exports Lower For May

Balance Of Trade Against Canada Was \$2,951,411

Ottawa, Ont.—The balance of trade was slightly against Canada in the month of May. Official figures issued through the Department of National Revenue show total exports of Canadian produce during the month at a value of \$40,564,404. In addition to this, exports of foreign products from Canada amounted to \$807,895, making total exports of \$41,402,299.

Total imports entered for consumption during the same month were \$44,353,710, of which \$16,027,203 were free goods and \$28,326,507 dutiable.

The balance of trade against Canada during the month was \$2,951,411.

Breaks World's Air Record

Desenzano Del Garda, Italy.—Lieutenant Nori, Italian service ace, flew 430 miles an hour to exceed the world's air record of 408.8 miles an hour, but he lost an elevation rudder on the final lap and his record was invalidated, it became known.

Pollution Of Fish Streams

Dominion Fisheries Inspectors On Watch To Prevent Injury To Country's Fish Life

Sawdust has its place, but not in streams frequented by fish, and part of the work of fisheries inspectors under the Dominion Department of Fisheries is to see to it that such waters in their respective territories are not polluted with mill refuse or other substances injurious to fish life. But how does sawdust, for instance, do harm to fish life? It has evil effect in two ways: By covering spawning beds it prevents the hatching of live fish from the eggs and, in the second place, it kills live fish by getting into their gills or breathing apparatus. Other kinds of waste—for instance, sewage from certain classes of industrial plants—are also injurious to fish life. It is because of these injurious consequences upon natural resources which it is important to conserve that the Department of Fisheries requires that its officers in areas where the fisheries are under federal administration shall make careful inspection of mills, etc., along streams frequented by fish and check any operators who may thoughtlessly be allowing sawdust or other refuse to fall into the water. Steps of this kind are of importance from the standpoint of fisheries conservation, and conservation is essential in the interests of commercial fishermen and anglers alike.

In most cases where refuse from an industrial establishment is reaching a fish stream the condition is willingly and promptly remedied by the operator when the fisheries inspector draws it to his attention. If this does not happen, however, prosecutions may be instituted under the Fisheries Act which provides that "no person shall cause or knowingly permit to pass into, or put or knowingly permit to be put, lime, chemical substances or drugs, poisonous matter, dead or decaying fish, or remnants thereof, mill rubbish or sawdust or any other deleterious substance or thing, whether the same is of a like character to the substances named in this section or not, in any water frequented by fish."

Planning Year-Round Supply Of Oranges

Jamaica Hopes To Have Variety

"Making This Possible"
Jamaica is planning to produce a variety of orange which will enable her to give a year-round supply, according to F. E. Holloway, president and general manager of Mutual Brokers, Montreal, Limited, who returned recently from a visit to the West Indies. Hitherto, the Jamaica oranges have only been marketed between the months of October and March. Mr. Holloway emphasized that Jamaica can produce oranges as cheaply as anywhere else in the world and he stressed the desirability of regarding the island's product as the "Empire Orange."

"The day will come," he affirmed, "when the Canadian market will take its full citrus requirements from Jamaica. Jamaica is the natural market of the Dominion just as Canada is the natural country to supply the needs of Jamaica."

Prayed In Thousands
Among its Egyptian inscriptions, the Field Museum exhibits a prayer from an Egyptian lady's tomb, in which she asked for "1,000 loaves of bread, 1,000 jars of beer, 1,000 alabaster vases of ointment, and 1,000 garments."

Wife—"That's the kind of husband to have! Did you hear Mr. Dixie tell his wife to go and look at some \$20 hats?"
Husband—"My dear, have I ever deprived you of the privilege of looking at \$20 hats?"

The boycott of foreign cloths in India has caused a 54 per cent. decrease in cloth imports.

"Mrs. Pitzke is said to be very economical."
"Yes, so economical that she uses another man to save her own husband."—Wahre Jakob, Berlin.

W. N. U. 1947

Use the Newspapers

Best Medium For Merchants To Use Advertising Dollars

Some firms which need business badly are taking bizarre means of attracting it—buying advertising bonuses for business amenities.

These are trying times for business—but time to use tried methods for getting business.

This is the time to use newspapers. The newspaper has not been discarded by depression. It still holds its circulation—and its audience. The audience wants it, and pays for it—every day!

The newspaper permits you to pick your better markets, and avoid advertising waste in poor ones; to reach customers to whom you can and do sell goods now.

The newspaper permits you to do serious selling—to use fact and reason and argument to pry dubious dollars out of wary wallets.

The newspaper permits frequency of appeal—at very low costs.

For better sales and better business, mobilize your advertising dollars where they will do you most good this year—in newspapers.

"Mounties" Becoming Very Strong Force

Is Now At Highest Establishment Since Its Foundation

With a strength of approximately 2,100 officers and men, the Royal Canadian Mounted Police is now at its highest establishment since its foundation in 1873. In the last few months it has received an accession of strength of nearly 800 all ranks due to the absorption of the customs preventive service and the provincial police of Alberta, Manitoba and the three Maritime provinces. Only British Columbia, Ontario and Quebec continued to maintain separate police forces; and the expectation is that an agreement ray shortly be concluded with the Pacific Coast provinces.

A unified protective force for the maintenance of the law in Canada is gradually being built up, with all the advantages that unified control confers.

Berries By The Barrel

Caretaker Of Grimshy Post Office Solves Problem Of Garden

George Warner, caretaker of the Grimshy Post Office, residing in apartments above this government building, has solved the problem of having a garden.

Early this spring he filled an old sugar barrel with earth, placed an old piece of tin in the barrel, bored 2 inch holes all around the barrel and planted strawberry plants in the holes. The plants grew and he now has 26 plants laden with green strawberries, as many as 20 perfect berries on a plant. The barrel is covered by the plants and sits on a pedestal at the back of the post office.

A Non-Existent Type

Few People Now Seen To Have Old Pioneering Spirit

Britain is over-populated, and Canada has room for millions. The problem is how to attract the men without work at home to settle on the vacant areas in this country. The old pioneering spirit that prompted the British settlers to come out at the beginning of the nineteenth century has evaporated. The present generation will not endure the hardships faced and overcome by the hardy men and women who took up land in Ontario from the Ottawa River to the St. Clair. They laid the foundation of our Dominion, but that type does not now exist.

Drivers Need Instruction

Many Operating Cars Pay No Attention To Rules

There is great need for some system of instruction of motor vehicle drivers, if there is ever going to be improvement in the accident record. There are many people driving cars whose performance is such as to suggest that a license should not have been issued. Good motor cars are property too costly to be left at the mercy of operators who either have never bothered themselves to learn the driving rules or who are incapable of following them.

One hears a great deal about the absent-minded professors, but none more absent-minded than the dentist who said soothingly as he applied the pliers to his automobile.

"Now, this is going to hurt just a little."

Animal diseases cost farmers of England \$100,000,000 last year.

Sirius is the most brilliant star in the whole sky.

ROYALTY LOOKS INTO THINGS

Even royalty is curious and sometimes likes to look inside to see what makes things go. Here is the former Crown Prince Wilhelm of Germany (bending over), apparently deeply interested in the powerful engine of Sir Malcolm Campbell's racing car. The world-famous British speed king, standing behind Prince Wilhelm, recently competed in the International Auto Meet in Berlin.

Scarecrow Had Grim Origin

Is Symbol Of Human Sacrifice Made In Dark Ages

The scarecrow was not invented to scare crows. According to the antiquarians, it had a grimmer origin than that—being a link with those dark ages when every enterprise was attended by human sacrifices. When a ship was launched a human life was sacrificed (this is now symbolized by the breaking of a bottle of wine). When a building was begun, again a life was sacrificed (now symbolized by the laying of a foundation stone). So the farmer, anxious to appease the gods of the weather and to ensure good crops, made his sacrifice. Gradually the practice of human sacrifice died out, but the farmer bowed to ancient superstition to the extent of putting up an effigy in his fields in place of the human being.

Robot Athlete Sets Pace

Mechanically Operated Runner Used On Track At Oxford University

Like the mechanical rabbit that leads the whippets in a dog race, a robot athlete is being used to set the pace for the track men at Oxford University, England. The figure of a runner, mounted on a mechanically operated rubber-tired wheel, moves around the outside of the track at different speeds. By keeping abreast of the speeding robot, the varsity men learn to judge the pace at which they are running. The innovation is said to be of special value in training distance runners, whose success largely depends upon their ability to "pace themselves" so that they can reserve sufficient strength to carry them through the final sprint.

Princess Has Eye Operation

A preliminary operation for removal of a cataract from the right eye was performed on the Princess Beatrice, aunt of the king. The operation took place at Kensington Palace. Princess Beatrice is the daughter of Queen Victoria and the mother of former Queen Victoria of Spain. She was 75 years old in April.

The average person in Switzerland eats 23 pounds of cheese a year; in this country the average is less than five pounds.

There are 1,300 radio broadcasting plants in the world valued at nearly \$29,000,000, and the annual cost of broadcasting is about \$72,000,000.

Lake That Disappears

Big Body Of Water In Georgia Goes And Comes

Big Jackson, husky brother of a triumvirate of fresh water lakes in Georgia, is visiting unknown parts again. This lake has a habit of disappearing and then returning to its bed in a most amazing manner. Big Jackson is about ten miles long and four miles wide when full and this is the second time within a year that it has dashed away through some mysterious subterranean channel and left only mud in its bed to explain the escape. Jackson, Micousukee and Iamoula form a triangle of big lakes along the Georgia-Florida line and have a partnership in the disappearing act. Each does the trick at irregular intervals every few years, but Jackson is the most proficient. The fish that fill the lake went too. When the water returns, fish will be unusually abundant. Whence the lakes go and what causes the recessions is a mystery.

Zuider Zee Now a Lake

Holland Can Reclaim 500,000 Acres By Series Of Dikes

The Zuider Zee, a familiar landmark on all maps of Europe for centuries, has become a thing of the past. Amid the screeching of sirens on hundreds of excursion steamers and tugboats the last gap was closed in the eighteen-mile dike connecting Wieringen with Friesland. The Zuider Zee thus became an inland lake, as it was before the North Sea rolled in over Northern Holland 600 years ago. Hereafter the Zuider Zee will be known as IJssel Lake; or, in the Dutch, IJsselmeer. The completion of the dikes will make it possible to reclaim 500,000 acres now under water for Queen Wilhelmina's little kingdom.

Twenty-Thousand Mile Trip

Thirty-three public schoolboys of England have just returned home after a three and one-half months' trip to South Africa, during which they travelled 12,000 miles by sea, 6,000 miles by train, and 2,000 miles by automobile.

Useless clogs, made in Bolton, England, are more popular abroad than at home.

Brazil plans to spend \$2,640,000 for new public works and railway and port improvements.

FANCIFUL FABLES

"—AND DON'T GO FOLLOWING ME AROUND, EITHER!"

Hay and Pasture

Varieties Of Crops Grown As Food For Livestock Are Limited

Take a drive into the country a little later in the season and note the different kinds of crops being grown in the farm fields. Some of these produce grain while others are primarily for hay and pasture. Of these latter, only rarely will crops be found other than sweet clover, western ryegrass, and bromegrass.

It must seem curious to the average person that one can count on the fingers of two hands the number of important crops that are grown to any extent as feed for livestock, while as a matter of fact, there are actually thousands of distinctly different kinds of grasses and legumes growing wild. Surely some of these plants which grow naturally should be equally as good or better than those which now occupy the fields.

Undoubtedly there are still valuable discoveries to be made but before these can qualify as field crops they must pass a very rigorous test with respect to several important qualifications. The truth is that exceedingly few wild plants can succeed as cultivated crops. Many have been called but few chosen. This is a case where the "merit system" works perfectly.

Before a hay or pasture crop can ever become widely used, it must be able to produce a satisfactory yield of hay or pasture and plenty of good seed; it must have good feeding quality and be able to resist disease and compete with weeds. It must also be winter-hardy, drought resistant in some areas and able to mature seed in our comparatively short growing season. Not only do crops differ in these respects but some varieties of the same crop are much more satisfactory than others.

It is clear that accurate knowledge is required to enable farmers to decide what to grow and how it should be grown. This need is being supplied by the Dominion experimental farms throughout Canada which are able to give this service by virtue of their excellent facilities and wide experience with farm requirements and varieties of field crops. Plant breeders are always on the lookout for valuable new plants and occasionally a discovery is made, as for example, Crest Wheat grass in the prairie provinces and Reed Canary grass for certain conditions in eastern Canada. The standard crops, also, such as sweet clover, western ryegrass and bromegrass are being improved by selecting, testing and multiplying the best from individual plants of special merit.—L. E. Kirk, Dominion Agrologist.

In Twenty-Five Years

Progress Of Canada During Past Quarter Of Century Has Been Phenomenal

One of the best cures for pessimism is a little reading of history. Of Canada's history. Yesterday, for example, we picked up a copy of an Alberta weekly newspaper and read this:

"Alberta is only a little over 25 years old, and 25 years is only a moment in the progression of history. "Yet during that brief period we have increased the sum total of agricultural products from 20 million dollars in 1906 to 161 million dollars in 1930, 176 million dollars in 1931, and 242 million dollars in 1932."

"Dairy products have increased from two millions to 13 millions in the space of 25 years."

"The farmers of Alberta are now cultivating 16 million acres of land as compared to one million acres in 1905. "Mining products in Alberta have increased from one million to 19 million dollars in the same space of time."

And what is true of Alberta is true, in slightly varying degrees, of the whole of Canada. Our progress has been phenomenal. There have been setbacks, of course, and we are presently experiencing one of them, but, judging by decades, our gains have been enormous.

"They will probably be just as great in the next twenty-five or fifty years."—Ottawa Journal.

After Thirty Years

A gold and amethyst seal, valued at \$500, found by a townsman on a Portsmouth, England, refuse dump, has been restored to its owner, Mrs. Margaret Curry, of London, England, who recognized it as having been stolen 30 years ago.

Diner: I know of nothing more exasperating than to find a hair in my soup.

Waiter: Well, it would be worse, wouldn't it, to have the soup in your hair?

Enough power is used to operate a giant radio tube in a Pittsburgh broadcasting station to push two street cars up a steep grade.

Gardening Notes

Make Several Plantings To Ensure Continuous Supply Of Vegetables

As you do not want to eat all of your vegetables at one meal, you should arrange when planting to have these come on gradually. The big advantage of the vegetable garden at the door, of course, is that the stuff so produced is much fresher than can be purchased, but to get the maximum freshness one must harvest just at the right time, too. By using early, medium, and late varieties and by making several plantings at weekly or ten days intervals, one will produce a succession of the freshest and crispest vegetables. Of course, with some plants which must be put in early, as they make their growth during the cool weather, successful planting is not possible, and all must go in in one or two plantings. This applies to spinach, peas, cress and a few others. To have a longer supply than usual, get several different varieties. In the lettuce, use the leaf sort for earliest, then the head type and finally the Coe, which will keep you going all summer. But with the bulk of the vegetables, that is, beans, carrots, corn, beets, new potatoes, cabbage and many others, it is quite possible to make at least three plantings, one small one very early, a second one about the average time, and another ten days later.

Platches of weeds in lawns and old-established perennial and old borders do not yield easily to ordinary methods. However, science comes to our aid with chemical destroyers which are now on sale in most stores selling seeds. During the past year many of these mixtures have been tried out at the Ontario Agricultural College and good results are reported in dealing with weeds in garden lawns, tennis courts, and along drives or paths. These things have also proven very effective in destroying dangerous patches of poison ivy around summer cottages. In fact, the last named plants have been tried out at the Ontario Agricultural College and good results are reported in dealing with weeds in garden lawns, tennis courts, and along drives or paths. MARGARET PEDLER

Author of "The Splendid Folly," "The Hermit of Par East," "Hodder & Stoughton, Ltd., London."

CHAPTER XXIII.—Continued.

"Then, to please me—for nothing else in the world, if you like, but because I ask it—will you let things stay as they are for a few weeks longer? Just that little while, Nick? We're going to London next week. That'll make a break—bring us all back to a calmer, more everyday outlook on things. Will you wait? Sir Adrian may never strike Claire again. And it wouldn't be fair—just now, at a time when she is feeling horribly bitter and humiliated from that—that insult—to ask her to go away with you. Give her a fair chance to decide a big question like that when things are at their normal level—not when they are worse than usual. To ask her now would be to take advantage of the feeling she must have, just at this moment, that her life is unbearable. It wouldn't be playing the game."

He made no answer, and Jean waited with increasing trepidation. She was sure now that she could hear footsteps. Someone had mounted the stairs and was coming along the corridor towards her room.

"Nick!" The low, agitated whisper burst from her as the steps halted outside the door. "Promise me!"

You can cook 3 vegetables AT ONCE

in the same saucepan by using **CANAPAR**

Do each vegetable up in its own bag of Canapar Cookery Parchment. There won't be any odor, not even from cauliflower. All the food value and flavor will be retained. And you use only one burner turned low for cooking. The flavors will not mix!

Do the same with boiled or steamed fish. You'll be delighted with the results. No fishy odor in the kitchen. No saucepan, or kettle to clean up. When roasting meat, line your pan with Canapar. Fats and juices won't burn. No more scraping or scouring of the pan afterwards. You can use Canapar repeatedly by simply rinsing it off and hanging up to dry. It doesn't absorb odors. Makes a perfect dish cloth. Silky, strong, and doesn't spread lint. Made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box.

Special Offer

Most grocers, druggists and department stores have Canapar on sale, but if yours hasn't, send this coupon direct to the makers and we'll give you a new and unique booklet entitled "Lettovers," containing one hundred recipes as a bonus for your trouble.

Applesford Paper Products, Ltd., Hamilton, Ontario, Canada. Enclosed find 25c for which please send me the full size package of Canapar Cookery Parchment and your 100 recipes for "Lettovers."

that we weren't meant to run away from things—hard things. If a man and a woman marry, they must accept their responsibilities—not evade them."

So absorbed was she in her trend of thought that she never realized how directly this speech must strike at Blaise himself. His face changed slightly.

"You're right, of course," he said abruptly. "You—generally are. And if all women were like you, it would be easy enough."

His eyes dwelt with curious intentness on the pure outline of her face, on the parted, tenderly curved lips, and the golden eyes with their momentary touch of the idealist and the dreamer.

It seemed as if the quiet intensity of his regard drew her, for slowly she turned her head and met his gaze, flushing suddenly and faltering under it. The consciousness of him, of his nearness, swept her from head to foot, and it seemed to her as though now, in this moment, they were in closer touch, nearer understanding, than they had ever been.

She stood very still and quiet when he had gone, realizing in every quivering nerve of her that whatsoever the future might bring—even that Blaise might choose to shut himself away from her again as in the past and the dividing wall between them rise as high as heaven—she knew now, without a shadow of doubt or questioning, that he loved her.

In the burning utterance of a single word, in the pressure of passionate, resounding lips, the assurance had been given, and nothing could ever take it away again.

She spread her hands, palms upward, and looked at them curiously.

CHAPTER XXIV.

An Unexpected Meeting

"Have you been very bored, Nick?" The week in London had nearly run its course, and Lady Anne's eyes begged charmingly for a negative. Nick accorded it with a smile.

"I'm never bored with you, madam; you know that," he said. "And hotel life is always more or less amusing. One comes across such queer types. There's one here this evening has been intriguing me enormously. At a little table by herself—do you see her? A tall, rather gorgeous-looking being—kind of cross between the Queen of Sheba and Lucille Borgia."

Lady Anne threw a veiled glance in the direction indicated.

"Yes, she's a very handsome woman, obviously not English." Her eyes travelled onwards towards the door. "I wish Blaise and Jean would hurry up," she added impatiently. "They're taking an unconscionable time to dress."

The two latter had come in late from a sight-seeing expedition undertaken on Jean's behalf, and had only returned to the hotel just as Lady Anne and Nick were preparing to make their way in to dinner. "For such a deliberate matchmaker, you're a lot too impatient, madam," commented Nick teasingly. "That they should have stayed out together until the very last moment ought to have pleased you immensely."

Lady Anne made a small grimace.

(To Be Continued.)

Fish and How To Cook It

Domination Department Of Fisheries Issues New Booklet Printed In Both French and English

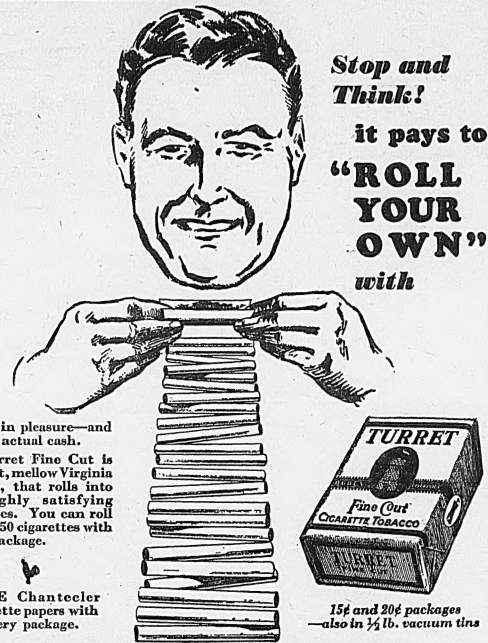

Copies of the new book, "Fish and How To Cook It," which has been issued by the Dominion Department of Fisheries, are now available either in French or English at a price of ten cents each. The booklet has been prepared under the direction of Mrs. Evelyn Spencer, specialist in fish cookery, who is now on the department's staff. It gives authoritative information and is designed to meet the needs of the average Canadian household. Persons wishing to receive the booklet should write the Deputy Minister of Fisheries, Ottawa, enclosing ten cents for each copy required and stating whether the English edition or the French edition is desired.

Trying Out New Plan

Celery To Be Cultivated In Canada For Bermuda Growers

A plan to cultivate celery in Canada between June and October, transplant it in Bermuda, and harvest it for export to Canada in February, has been made known by W. R. Evans, marketing adviser to the Bermuda Department of Agriculture. It is understood that an expert is coming to Montreal to plant the first seeds.

The scheme would advance the opening of celery shipment from Bermuda to Canada by two or three months.

It pays in pleasure—and pays in actual cash.

For Turret Fine Cut is fragrant, mellow Virginia tobacco, that rolls into thoroughly satisfying cigarettes. You can roll at least 50 cigarettes with a 20c package.

THE RHYMING OPTIMIST

By Aline Michaelle

THE GIFT OF SONG

Just sometimes hope's rainbow is spanning
The bridge we have built of our dreams;
Just sometimes each bit of our plan
Works out in accord with our schemes;
Then how gladly we go
Through a world all aglow
Where the sunshine of happiness gleams!

Some seasons no wind is unkindly;
Every seed that we plant comes to bloom,
And the way we have trodden so blindly
Leads us up from the shadows and gloom;
Leads us into the light
Where we know life afloat
And find bliss in its wine-sweet perfume.

Just sometimes we give thanks at the ending
Of hours, or sorrow, or doubt,
And just sometimes we pause, comprehending
Our blessings, with hearts grown devout;
Then we taste of a joy
Without dregs or alloy
In the splendor that rings us about!

Shipyard To Close Down

Earle's shipbuilding yard at Hull, England, one of the oldest organizations of its kind on the east coast, is closing. During its 80 years of existence it has produced nearly 700 vessels of all classes, including 17 ships for the British navy, and a countless quantity of marine engineering.

Honor the Dead

The graves of Redcoats killed in the battles of Concord and Lexington 157 years ago are not forgotten. Annually delegates of the British Naval and Military Veterans' Association of Massachusetts make a pilgrimage here to place wreaths on them.

Scotland has a safe-driving campaign.

Animal diseases cost farmers of England \$100,000,000 last year.

All worn out... splitting headaches make life hideous every month. She needs a tonic... Lydia E. Pinkham's Vegetable Compound relieves cramps.

Painting Eiffel Tower

Engineers Think Structure May Become Menace In Twenty Years

The Eiffel Tower is forty-five tons heavier than it was last year. That is the amount of paint that forty-five painters are applying to the giant steel skeleton, still the third highest structure in the world. Only the Empire State and Chrysler Buildings in New York are taller.

Paris engineers went over the tower on an annual inspection and found it in good shape. Several engineers say that it can stand for another century before it will have been worn out by the elements, but most engineers agree that it may become a menace in twenty years.

By 1950, Eiffel Tower may have to be torn down or rebuilt, the process of rebuilding being such a costly and difficult task that Paris may easily lose the most visible feature of its skyline. The base of the great tower is stronger than its top and this is explained by the fact that the top ways in high winds and twists the metal.

The tower is being painted yellow and brown, which all Parisians agree is not pretty. Engineers say that paint of those two colors will increase the life of the tower. One American firm offered to paint the tower with aluminum paint just for the publicity, but this was opposed.

Wise and experienced mothers know when their children are troubled with worms and lose no time in applying Miller's Worm Powders, a most effective vermifuge. It is absolute in clearing the system of worms and restoring those healthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

How "Milliner" Originated

Word Was Formerly "Milaner" Given To Milan Merchants

Milan, in Italy, was once the great centre of trade in silks, velvets, and other fine wearing apparel, and any merchant dealing in Milan goods was known as a Milaner. In addition to hats and gowns, gloves and stockings, the original Milaner also dealt in glass, cutlery and inland armor. As trade became more specialized, however, the Milaner, or milliner as he gradually became known, confined his attention to women's wear, and finally to hats alone.

Women Outnumber Men

A fifth of the total population of Scotland is concentrated in Glasgow, the decennial census figures, now made public, show. The population of Glasgow is given as 1,088,461, with 107 females for each 100 males. In Edinburgh the women outnumber the men by 12 to 10.

Alaska seal herd is estimated at more than 1,000,000 animals.

Little Helps For This Week

"Come unto Me, all ye that labour and are heavy laden, and I will give you rest."—Matthew xii, 28.

Come, said Jesus' sacred voice, Come unto me my paths your choice; I will guide you to your home, Way pilgrim, hither come. Sinners, come! for here is found Balm that dows for every wound, Peace that ever shall endure, Rest eternal, sacred, sure.

Anna Laetitia Barbauld.

Christ's invitation to the weary and heavy laden is a call to begin life over again upon a new principle, "Watch My way of doing things," He says; "Follow me, take life as I take it; be meek and lowly, and you will find rest."—Henry Drummond.

Relieve Asthma At Little Expense. Thousands of dollars have been vainly spent upon remedies for asthma and seldom, if ever, with any relief. Dr. J. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. Your dealer can supply you.

Buckwheat Destroys Weeds

Among the many uses of buckwheat as a field crop perhaps none is more important than its value as a weed destroyer, states crop specialists of the Dominion Experimental Farm. Its value in this connection arises from its quick germination and rapid growth. The fact that two crops of buckwheat can be raised during one year usually makes it particularly effective in the eradication of even such difficult weed problems as those presented by the Sow Thistle and Quack Grass.

Rheumatism So Bad He Had to Quit Work

Albert Berger Not Bothered Since Relieved by Dr. Williams' Pink Pills.

"I was terribly bothered with a weak back and rheumatism in my shoulders," writes Albert Berger, Wingo, Ohio. "It got so bad I had to stop working and stay in bed."

I was two weeks in bed, when a friend advised me to try Dr. Williams' Pink Pills. I gave the Pills a fair trial, and they relieved me right away. My back is good and strong now, and I am working every day. I have never been bothered with rheumatism since. I recommend them for anyone suffering from Rheumatism, Lane Back, Sciatica, Rheumatism and kindred ailments thin the blood very rapidly. Dr. Williams' Pink Pills enrich the blood stream and create new red blood cells, which is the reason they are so successful in combating such ailments. Equally good for all run-down or nervously exhausted people. Try them. At your druggist's. E.C. 273

Working Every Day Now.

The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter. All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per cent line. Legal advertising, 15c per cent line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Alberta Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

TABLE HINTS

Only guests with the steadiest nerves should attempt eating peas with a knife.

Leave the napkin: It's too small for a sheet, and too large for a handkerchief.

When in doubt, help yourself first. Otherwise someone else takes what you want.

The newest soup absorbers pay for themselves in reducing the cost of dry cleaning waistcoats.

The bashful may be the best liked, but they get the least.

If you will smoke at the table, y'll have to take it for granted the others like it.

Here and There

Captain L. D. Douglas, R.N.R., recently named commander of the Pacific speed Queen, the Empress of Japan, largest of Canadian Pacific liners on the Pacific, recently brought his 26th birthday along with him, B. Vancouver within 44 minutes of the Pacific record.

His Excellency Rana Phagat Chandra Bahadur, Rajah of Jubbal, was a traveller on the Empress of Japan from the Far East, recently. He might have been taken for any business man but for the presence of his wife, daughter of the Maharajah of Kathlaad, India, who was attired in Indian garb.

Crop conditions in western Canada are most encouraging and, given normal weather conditions, the quantity and quality of the harvest will go a long way towards restoring confidence and prosperity. Grant Hall, vice-president of the Canadian Pacific Railway, stated recently on his return from a tour of inspection of the company's property.

Final figures of butter production in Alberta for 1931 amount to 22,957,922 pounds, which is more than 800,000 pounds above the previous highest year's record for the province. Closely associated with butter production is a movement inaugurated by the Federal and Provincial Departments of Agriculture to encourage farmers to enlarge their forage crop areas.

Major "Bill" McGeehan, one of America's best known columnists, and Lionel Hitchman, veteran defence man of Boston Bruins, landed a 19 and a 30 pointer salmon from New Brunswick waters respectively in May. The Major got his fish with a four-ounce trout rod on the Cain's River, Hitchen was fishing at Hart's Pool near Fredericton on the Saint John River.

John Cudahy, of Milwaukee, hunting across the Great Divide near Banff, and faced by a furious charging wounded grizzly almost within striking distance and with but one cartridge left in his rifle, coolly stood his ground and dropped the monster at his feet. Mr. Cudahy has hunted in India, Africa and Alaska, but said he had never had the thrills he experienced on this recent grizzly hunt.

Success of the bargain trips over week-ends and holidays which the Canadian Pacific has put into effect this year was further attested by the great popularity enjoyed during the recent Victoria Day holiday and in week-ends following. To take one large centre—Montreal—the city was literally invaded by the great influx of visitors from eastern Canada and the United States and other big Canadian cities report similar conditions.

Brother officers of the Canadian Pacific Railway, representatives of transportation systems in Canada and the United States, members of the Masonic Order and of Rotary and sorority friends from virtually all walks of life united in an impressive tribute to the late George A. Walker, general passenger agent of the railway at his funeral in Montreal recently. The remains were taken to Winnipeg where burial took place in the Elmwood Cemetery with Miss Honor James D. McGregor, Lieutenant-Governor of Manitoba, Mayor Ralph H. Webb, of Winnipeg, and many officers of the company in attendance. The Grace Archbishop Matheson, assisted by the Rev. H. S. Reed, of St. Luke's Anglican Church, conducted the funeral service. (847)

C. Grey Dies Suddenly

Found Dead on the Farm of J. Sutherland

On Wednesday morning Clarence Grey, aged 17, who has been working for Mr. J. Sutherland, northeast of Chinook for the past month, was found dead in the field. His home was at Tofteld, Alberta.

From reports received, heart failure was the cause of his death.

Hopeful Spirit in Alberta

The Lethbridge Herald says:—"Maybe we do not see our west as the visitor does, but the impression the traveller obtains is sufficiently cheering to send him away with the feeling that there is more hopefulness in Alberta than anywhere else in the country. A trip to Montreal, Toronto or Ottawa, with a little mingling with the nabobs of finance and industry, places one in an atmosphere of gloom, and the only escape is to move westward, where people don't take their setbacks with so much downheartedness."

"Alberta, for we are assuming to speak for all the west, has shown reserve power in these three years of crisis that would have been undreamed of in 1919. Recall the collapse in the stock market and of farm prices and realize that it has been a more or less steady process for some three years and then be told that Alberta leads the Dominion in the drive for new business on the part of a prominent life company; that the Chautauqua for a week in Lethbridge had crowded attendances; that small places in purely agricultural areas put on celebrations and sport days, and get away with a profit. What's the explanation? Possibly our people are not hoarding; they're confident a better time is coming. Our answer, however, is that there is a reserve spending power that is not yet exhausted. We've heard so much complaining and agitation from elements in our population in past years that we learned to opinion that most people were 'broke.' But it is not so. The failures, the debtors, always make a big noise and they don't need to be numerous to create an uproar. The successful fellow don't talk; they go quietly about their business and if they can't sell enough to carry things along in bad times, they tap the resources they had aside in better years for such a day. They cannot keep so forever, but they're hoping the tide will soon turn. They're not talking blue ruin, as they are in the eastern centres."

Puzzle This One Out

It has become the privilege of a nearby town to solve economic problems of the world. And it is so simple that one can only wonder no one ever thought of it before.

It appears that a man who wanted a tie went and bought it in a store. He gave the merchant a check for a dollar. The merchant passed on the check at a restaurant for his lunch and it went from hand to hand until it had twenty endorsements. When there was room for no more it was passed into the bank where it was found that there was no account.

The 20 signators then met and it transpired that each of them had made a profit of approximately 25 per cent. Wherefore they contributed 5 cents each and redeemed the check. They are now wondering who lost the original dollar that did not exist.

This is a neat epitome of modern finance. If the check had been paid in at once, one man would have lost a dollar. As it is 20 men each made 25c.

Heard Around Town

Monday, June 27, is the next regular monthly meeting of the Chinook Chamber of Commerce.

A large number of Chinook citizens attended the Collihome Local U.F.A. Sunday at Faulkner's Grove.

Mrs. Osterberg, whose home is south of Chinook, had a very serious but successful operation in the Cerebral hospital last week—Cerebral Recorder.

Last Friday afternoon Miss Madeline Otto acted as stenographer at the court cases tried before Magistrate Peck at Cerebral.

Chinook baseball team has entered the baseball tournament which is to be held at Hanna July 1. As far as can be learned, the following teams have entered besides Chinook: Hanna, Endiang and Delia.

Travellers passing through Chinook state crops around this district are further advanced and better looking than at any other point in Southern Alberta. Damage from pests of any sort is almost non-existent. The district as a whole looks better than it has done at this time of year for a number of years.

In announcing contributors to the Chinook and District School Fair prize list in a recent issue we mentioned the National Elevator Co. as a donor. This should have read the "Alberta Pacific Elevator Co." Since recording the last contributions the secretary has received donations from the following:—Blue Ribbon Tea Co., F. Eaton Co., Chinook Women's Institute and the Peyton school districts.

Mr. J. Miller, Innisfail, agent of the Sun Life Assurance Co., left on the 11th inst. to attend the company's annual convention held this year at Murray Bay, Que. Only three men in Southern Alberta were successful in qualifying for this outing and Mr. Miller was fortunate enough in being one of those three. En route east he will visit friends at Edmonton, Melville, Winnipeg, Fort Frances, Meaford and St. Helen's. His return trip will be by way of the States, through Chicago and Minneapolis, and home by way of Calgary. The "Advance" and Mr. Miller's Chinook and district many friends are pleased to hear of the success he is enjoying in the insurance field.

Capt. Peters paid Youngstown a business call Monday.

Miss Helen Gripp, of Oyen, arrived in town Monday to accept a position in the Chinook hotel.

The Canadian National Railways have made another change in the time of the two passenger trains going through Chinook. Both east and west trains will run on Sunday morning at their usual hours; but on Monday mornings there will be no trains.

Dr. Daley and Miss N. J. Daley, of Little Gem district, visited Chinook friends this week.

Mr. and Mrs. Lorne Proudfoot and little son, Billie, motored to Fish Lake where they visited at the home of Mr. Proudfoot's brother over the week-end.

Miss Agnes Gingles, of Edmonton, arrived here Saturday morning and will spend two weeks visiting at the home of her mother, Mrs. Gingles.

A special meeting was held in the Consolidated School on Monday evening June 20, for the purpose of selecting a teacher for the intermediate room. Miss Edna B. Parker, of Three Hills, Alta., is to be the teacher for next term.

Mr. and Mrs. O. D. Harrington, Ruth, Hazel and baby, Marjorie Lorena, returned from Lavozy last week. Mrs. Harrington had been visiting with her sister at that place for some time.

Mrs. Walter Anderson visited at the home of Mrs. M. C. Nicholson on Monday.

Fourteen guests were registered at the Chinook hotel Tuesday evening.

Chinook baseball team defeated the Consort nine on the latter's diamond Wednesday afternoon by a score of 2-1.

Mr. and Mrs. C. E. Neff, of Hanna, are visiting for a few days at the home of their daughter, Mrs. J. C. Turple.

Mrs. Lawson and Mrs. O'Neill, both of Drumheller, are visiting this week at the home of Mrs. P. Petersen.

A meeting of the School Fair officers and directors will be held on Saturday at 8 p.m. in the consolidated school hall.

Changes have been made on long distance telephone lines between Oyen and Youngstown, as a result Chinook will be a toll center for Cerebral and Sedalia.

Mr. E. C. Quick, editor of the Youngstown Plaindealer, was a Chinook visitor Monday evening.

Capt. Peters left by car on Thursday morning on a vacation trip to Miami, Florida. He will be accompanied by Mr. O. Mielki as far as Chicago. Mr. Gilbertson will have charge of the Imperial Building Supplies' office during Mr. Mielki's absence.

Service will be held in the Chinook United Church next Sunday at 7:30 p.m. The Rev. Mr. Woollett will take for his subject "The Rural Church and Our Church." Service will be held every alternate Sunday at 7:30 p.m. Service will be held at Heathdale on Sunday, June 26, at 11 a.m. and every alternate Sunday.

R. Bronston was the holder of the lucky ticket for the free hamper of groceries given away at Capt. Peters' dance last Saturday evening. Over 90 paid admission tickets, besides those who got in "free" through the side door, proves that the interest is not waning in these Saturday evening dances given by Captain Peters in the ballroom of the Chinook Hotel.

Reduced Freight Rates

Reduced freight rates for the movement of live stock in quantities less than full carloads have been established by the railways, according to an announcement made by the Canadian Freight Association. Heretofore a live stock shipper has been required to ship or pay for 20,000 lbs. in the case of hogs and sheep in order to ship under the carload rates. The new schedules which became effective June 15, provide for additional rates subject to minimum weights of 12,000 and 6,000 lbs in the case of cattle, and 11,000 lbs and 6,000 lbs, in the case of hogs and sheep. The rates for the smaller car lots are somewhat higher than for the full cars, but they give the shipper who has not sufficient stock available to make up full cars an opportunity of getting the smaller quantities to the markets by rail. The new rates will apply to markets centres from points in the prairie provinces within a radius of 200 miles. It will be permissible for cars to be stopped at an intermediate point in transit for a completion of a load at a charge of \$3.00 per car. In making the announcement the Canadian Freight Association stated the new rates are in the nature of an experiment for one year.

DENTIST

will be here regularly the 1st and 3rd Thursday of each month hereafter at the CHINOOK HOTEL Reception Parlor, 1st floor.
